Trainees registered in training programs by location

The following data was prepared by the RACP as part of our annual reporting to Te Kaunihera Rata o Aotearoa | the Medical Council of New Zealand (MCNZ) and the Australian Medical Council (AMC).

Notes on interpretation

- 1. This includes trainees registered for any part of the year including interruptions to training.
- Trainees who progressed from Basic Training to Advanced Training mid-year are counted under both.
- 3. Dual trainees are counted under each program they were registered for. The total number of training program registrations is greater than the number of unique trainees who were registered.
- 4. AMD Adult Medicine Division
- 5. PCHD Paediatrics and Child Health Division
- 6. If a trainee undertakes training rotations in more than one location, they will be counted as a unique entry under each location. Accordingly, this figure is lower than the sum of totals for each location.

Table 1 Trainees registered in training programs by location, 2023

Total training program registrations		2493									9593 ^{2,3}
Number of trainees registered ¹ This includes trainees re		2197									8236 ^{3,6}

¹This includes trainees registered for any part of the year including interruptions to training.

²Trainees who progressed from Basic Training to Advanced Training during 2018 are counted under both.

³ Dual trainees are counted under each program they were registered for. The total number of training program registrations is greater than the number of unique trainees who were registered.

⁴AMD - Adult Medicine Division

⁵PCHD - Paediatrics and Child Health Division

⁶If a trainee undertakes training rotations in more than one location, they will be counted as a unique entry under each location. Accordingly, this figure is lower than the sum of totals for each location.
