Postgraduate programs

Postgraduate study preparing you to shape the future

Our coursework and research postgraduate programs are multidisciplinary. With a rigorous curriculum and access to excellent facilities for researchers, these programs prepare you for leadership in brain and mind sciences.

Postgraduate program by coursework

The postgraduate program by coursework in Brain and Mind Sciences builds on existing undergraduate offerings of the University of Sydney. We provide students multidisciplinary training from internationally recognised leaders and an education environment that offers a unique, interdisciplinary brain and mind science curriculum.

Update

There has been a dramatic drop in fees for the Continuing Medical Education (non-degree) psychiatry programme. This will now be \$6,055 spread across three years- \$865 per unit of study (7 units in total) and \$250 for the Forensic Psychiatry module.

All are required to complete the Formal Education Course requirements of the Royal Australian and New Zealand College of Psychiatrists. Please see below to find out about the CME pathways.

Master of Brain and Mind Sciences

+

Non-degree Continuing Medical Education Psychiatry course

+

Postgraduate degrees by research

In the postgraduate program by research, students undertake a supervised research project working with global leaders in brain and mind sciences. During this course, you will use dedicated research laboratories and clinical services, translating research outputs into cutting-edge, integrated care.

Students at the Brain and Mind Centre can enrol in postgraduate research degrees available in a variety of fields such as science, health sciences, medicine, nursing and psychology. We currently offer the following courses:

Master of Philosophy (Medicine)

+

Doctor of Philosophy in (Medicine)

+

We recognise and pay respect to the Elders and communities - past, present, and emerging - of the lands that the University of Sydney's campuses stand on. For thousands of years they have shared and exchanged knowledges across innumerable generations for the benefit of all.
