	International RN Orientation Program		Wonderful leadership	RN	Participant
	International RN Orientation Program		Each day has been interesting	RN	Participant
	International RN Orientation Program		Ward working day	RN	Participant
	International RN Orientation Program		Everything is useful and helpful	RN	Participant
	International RN Orientation Program		The one month CREST program was really amazing the stimulation lab scenarios has helped me to think critically on all aspects rather than focusing on the presentation. In addition the use of virtual camera and headphones in SIM lab has given me an insight about what to expect when in start working in the clinics. Towards the end I felt that I needed more sessions and the whole month gone very quickly. Once again our both trainers Gabby and Paul were amazing they had answers to literally everything.	RN	Participants
	International RN Orientation Program		The training was outstanding as it has covered most of the emergency scenarios . The A-G assessment and SIM lab experience has moulded my critical thinking skills . Once again I am thanking Paul and Gabby for their hard work and effort in our training sessions.	RN	Participants
	International RN Orientation Program		The days at CREST were informative and helped us to work smoothly and confidently RN	RN	Participant
	International RN Orientation Program		The CREST training helped a lot to make sure our outcome in our work settings is positive.	RN	Participant
	International RN Orientation Program		During our 1 month training what both of us put the input is our outcome in work settings today, It helps a lot and sure it will make influence in our nursing Thank you so much for our good inspiring mentors and for making learning an enjoyable experience,	RN	Participant
	International RN Orientation Program		I would like to say always to you and Paul a big thanks. The days which we all spent at CREST were beautiful and informative, The training we had really helping us to work smoothly and confidently. Also the rapport you made with us really amazing and friendly . I enjoyed a lot . Thank you	RN	Participant
	Anaesthetics		Helpful	RN	Participant
	Anaesthetics		Hands on component	RN	Participant
	Anaesthetics		Hands on and vsual models with responseviness to learners needs	RN	Participant
	Anaesthetics		Relaxed atmosphere	RN	Participant
	Anaesthetics		Knowlesdge sharing	RN	Participant
	Peri Op		Hands on learning	RN	Participant
	Peri Op		Practical participation	RN	Participant
	Peri Op		Relaxed atmosphere and visual models	RN	Participant
	Peri Op		Hands on approach	RN	Participant
	Peri Op		Knowledge sharing	RN	Participant
	Peri Op		Presenter and information	RN	Participant
	Peri Op		Very relevant	RN	Participant
	1/09/2023 Peri Op		4 members of the perioperative nursing staff were fortunate to attend education at Wellington Hospital Crest Simulation centre in September last year. We were informed about this training from Candice Maher CNE. All members RN'S & one EEN found the day to be extremely worthwhile. The topics covered were very appropriate to our work setting & all felt great benefit of attending. We have been able to apply knowledge & skills learnt on that day to our practice. I have recommended to other staff whom were unable to attend to consider applying when offered again.	NUM	Manager
	Peri Op		Applicable and setp by step	RN	Participant
	Prelude to Solo Simulation		great opportunity to sim		Participant
	Prelude to Solo Simulation		how to write learning objectives		Participant
	Prelude to Solo Simulation		debriefing skills		Participant
	Prelude to Solo Simulation		importance of thorough and collaborative preparation for SIM		Participant
	Prelude to Solo Simulation		Human factors		Participant
	Prelude to Solo Simulation		New ways to deliver SBE		Participant
	Prelude to Solo Simulation		Pull ideas don't push facts		Participant
	Prelude to Solo Simulation		How to plan your objectives		Participant
	Simulate to Educate		Relevant		Participant
	Simulate to Educate		Good to have practice		Participant
	Simulate to Educate		Adaptive		Participant
	Simulate to Educate		The chance to debrief and get feedback during debriefing		Participant
	Simulate to Educate		Supportitve and safe environment		Participant
	Simulate to Educate		Experiential learning		Participant
	Simulate to Educate		Support and Guidance for delivering Sims		Participant
	Simulate to Educate		Engaging and encouraging		Participant
	Simulate to Educate		Konwledagible and enthusiastic trainers		Participant
	Simulate to Educate		opportunity to practice skills		Participant
	Simulate to Educate		It was such an engaging and 'gold nugget' rich course with all the tips and tricks and exceedingly valuable coaching and advice in addition to the content		Participant
	Simulate to Educate		Paul and Gabrielle are very engaging. They are very knowledgeable and able to teach about how to run a debrief well		Participant
	Simulate to Educate		Excellent structure to teaching sims, great feedback, really helped with my confidence		Participant
	Simulate to Educate		I would just like to say how wonderful the CREST SIM Lab in Wellington is. From the moment I commenced in WNSWLHD mid 2023 I have heard all about the courses run at the SIM Lab and how much nurses have learned. I have been lucky enough to attend the High Performing Teams pilot workshop, CREST SIM Prelude to Solo Simulation and Simulate to Educate - Simulation Facilitator Workshop. These courses have provided me with the tools to develop my simulation skills in a safe and supportive learning environment.	CNE	
	Simulate to Educate		As a CNE the support that I have received from Gabrielle from the SIM Lab has been amazing. She has given me advice on maintaining SIM manikins, shared "recipes" for making SIM equipment such as how to make a "boggy" uterus, fake blood, etc and created a community of like minded people for us to collaborate. Gabrielle and Paul have also been willing to bring their knowledge and skills to Mudgee to provide education for our staff locally.		Participant

	Prior to attending the recent Simulation Course at Wellington, I had stepped into the Educator's role with no experience in presenting or running simulations. Before attending the course I would avoid running simulations, if I did have to run a simulation I lacked confidence, I was nervous, apprehensive and felt incompetent. Since attending the simulation workshop, I now have the confidence to run a simulation in my workplace, I am writing simulations to perform and I have learnt how to make simulation a positive experience for staff. I would definitely recommend this course to other staff.	CNE	Participants
Simulate to Educate			
Simulate to Educate	I was curious to see the resources at SIM central. It's great and puts a realistic perspective on developing and introducing staff. I definitely learned a lot and thoroughly enjoyed the day. It made me realise the importance of setting goals when preparing a SIM and the importance of debriefing to achieve the goal.	CNE	Participants
Simulate to Educate			
	In my dual role as CNE for Learning and Education at Bathurst Health Service (BHS) and the Assoc. Lecturer in Clinical Skills & Co Ordinator for the Critical Care Programme at Western Sydney University (Bathurst Rural Clinical School), I would like to outline how immensely helpful and supportive the Wellington Simulation Centre has been.	CNE	Participant
	Both Gabby Arnold and Paul Cooper, of Wellington Simulation Centre, have offered training for our educators at Bathurst to understand the fundamentals of simulation education, the theory underpinning this model of education, how to debrief participants and methods of obtaining quality feedback.	Manager	Participant
Prelude to Solo Simulation			
	Staff from BHS have attended their 'Simulate to Educate' workshops during 2023 and 2024. There are now plans for the Debriefing workshop to run in April 2024. This workshop will be offered to any staff who are involved with both 'Hot' or 'Cold' debrief sessions as well as those who debrief sim exercises. This will be manifestly important to the psychological wellbeing of our staff after critical incidents.	Manager	Manager
Simulate to Educate			
	Gabby Arnold has also functioned as my mentor as I step into the role of co ordinating and running a simulation schedule for BHS in 2024. Having both the above mentioned educational platforms alongside mentor support has been invaluable for developing a simulation programme at BHS as we work to improve outcomes at the hospital.	CNE	Participant
Simulate to Educate			
	In my role with Western Sydney University Bathurst Rural Clinical School, Gabby Arnold has given her time to assist us in delivering interprofessional simulation. These weekends bring health students out from Sydney to experience rural health care in a simulated setting. It is designed to assist students to become 'collaborative, practice ready' health professionals. Importantly, it also aims to attract new health workers to consider working in rural locations.	CNE	Participant
	In addition to the above, the Wellington Simulation Centre has also provided advice on simulation equipment, mannikins etc. This has assisted in the judicious spending of funds, targeting more useful items rather than purchasing expensive products which are more cumbersome to use.	CNE	Participant
	Since it's opening in 2023, The Centre for Rural Education, Simulation and Training Simulation Centre at Wellington, has provided education and support to BHS and WSU BRCS as we work towards safe patient care and staff retention. The level of collaboration, assistance, advice and support has had an invaluable impact here at Bathurst Health Service.	Manager	Manager
	Yes. Being able to Debrief effectively is an important tool for not only staff psychological safety but also assists with the reflective process and improved patient care.	Dr	Participant
Debriefing			
	still consider myself very much a 'novice' who needs lots of practice, but I now feel I have more tools to use and better able to engage more deeply with Sim participants.	Dr	Participant
	I absolutely loved all the creative videos used and the humour woven throughout the learning. The Facilitators were eminently skilled in this topic and it was a pleasure to spend 8 hours with them. Loved the day	Dr	Participant
	think there should be more pre briefing and debriefing in our general practice to prepare and check in on our staff as normal practice	Dr	Participant
Gamification			
	Practical interactive and engaging	Dr	Participant
	Humour and examples of educational sessions	Dr	Participant
	Love the practice	Dr	Participant
	Thank you Gabrielle it is always fun and engaging education with you	Dr	Participant
