Hi Winston,

I did enjoy a good break thank you and I hope / entrust you did too?

Winston I must admit I am a little perplexed by your request.

My understanding from our meeting last year (that you have referred to) is that Teresa and John invited you to attend the monthly District Quality Council to enable you to gain a better understanding of the systems and processes that are employed by the District to ensure we maintain our high standards of quality and safety in our service provision across the District. As you will come to see, in that committee we review reports based on quality and safety data and analysis, new Policies for endorsement, facility quality council committee minutes, other relevant committee reports and so on. Yes we do also have a presentation or 2 each month but these are usually based on a service/ unit presenting to the District their data on the work they are doing and how it compares with peers or impacts on patient care/ service delivery.

So, on behalf of Teresa and myself as Chair, I would again invite you to attend the meetings from February to gain a better understanding of what transpires. In the meantime, if you hold concerns regarding "important clinical issues" at Concord I would suggest you would need to first ensure you can validate those concerns by the provision of relevant verifiable data that reflects your concerns and then present that to your local executive. If you feel that the issue remains and perhaps those concerns are not being heard or addressed, than the next step would be to meet with Teresa, Andrew Hallahan and myself to presents the facts/ data supporting the analysis of those clinical issues of concern so that those issues may be considered for further action based on the veracity of your claims.

Over time, you will come to see the difference between what you are proposing and how our clinical council operates.

I hope this helps clarify matters.

John

Cheers

Dear John,

Hope you have had a good break over the holiday period.

I understand the next SLHD Clinical Quality Council Meeting is on 22 February.

As discussed with John Ajaka, Teresa and yourself at the meeting on 15 November last year, I would like to present some of the important clinical issues at Concord to the SLHD Clinical Quality Council.

John Ajaka told me that important clinical issues should be raised at this forum, as well as through the usual channels.

I envisage each issue will take 5 minutes to present, and then there may be 5 minutes of questions and discussion from the council. Therefore we could discuss 6 issues in 60 minutes.

I understand this may take up a large proportion of the meeting, but I think the issues are important enough to warrant a few minutes discussion each.

Can we arrange an extended meeting on 22 February to accommodate this?

I need to give the relevant stakeholders as much notice as possible so that they can make arrangements to present.

Many thanks.

Regards,

Winston Cheung
