# VERSION CONTROL

Date	Indicator No.	Measure	Version Control Change
07/10/2022	KS2142	Potentially Preventable Hospital Services (%)	Business Owners Updated
07/10/2022	SIC108	Electronic Discharge Summaries: sent electronically and accepted by a GP Broker system (%)	Business Owners Updated
1/11/2022	SSA140	Breast Screen participation rates	Targets adjusted
1/11/2022	KS2140	Third or Fourth Degree Perineal Lacerations (Rate per 10,000 episodes of care)	Wording adjustments
1/11/2022	KSA202	Emergency Department Extended Stays: Mental Health Presentations staying in ED > 24 hours (number)	Corrected error in indicator definition
3/11/2022	SSQ114	Discharged Against Medical Advice for Aboriginal Inpatients (%)	Minor wording changes and update to related policies.
3/11/2022	SSQ106, SSQ107	Unplanned Hospital Readmissions: all unplanned admissions within 28 days of separation (%)	Minor wording changes
3/11/2022	PH-013A, SPH007	Smoking during pregnancy - At any time: (Number)	Update to related policies
3/11/2022	SPH012	Children fully immunised at one year of age (%)	Minor wording changes
3/11/2022	KS2410	Aboriginal Paediatric Patients Undergoing Otitis Media Procedures (number)	Update to targets and related documents list
3/11/2022	DPH_1201	Pregnant Women Quitting Smoking - By the second half of pregnancy (%)	Update to related policies list
3/11/2022	SPC108	Aboriginal Workforce Participation: Aboriginal Workforce as a proportion of total workforce at all salary levels (bands) and occupations: (%)	Update to context
3/11/2022	KPI21-01	Staff Engagement and Experience – People Matter Survey - Racism experienced by staff - Variation from previous survey (%)	Update to related policies list
3/11/2022	SSA101	Emergency Treatment Performance - Admitted (%)	Contact details updated
3/11/2022	KSA202	Emergency Department Extended Stays: Mental Health Presentations staying in ED > 24 hours (number)	Update to related policies list
3/11/2022	SSA105	Emergency Department Presentations Treated within Benchmark Times – Triage 1 to 3 (%)	Update to related policies list
3/11/2022	KSA101	Transfer of Care – patients transferred from Ambulance to ED≤ 30 minutes (%)	Update to related policies list
4/11/2022	KS2302	Patient Engagement Index – adult admitted patients (Number)	Targets updated

Date	Indicator No.	Measure	Version Control Change
4/11/2022	PH-011C	Get Healthy Information and Coaching Service – Get Healthy in Pregnancy Referrals (% variance from target)	Wording changes and update to targets.
4/11/2022	MS1102	Childhood Obesity: Children with height/length and weight recorded	Multiple minor changes to wording
8/11/2022	KPI21-03	Ethics Application Approvals - By the Human Research Ethics Committee within 75 calendar days - Involving greater than low risk to participants (%)	Change within 90 days to within 75 days. Update to related policies.
8/11/2022	KPI21-04	Research Governance Application Authorisations – Site specific Within 45 calendar days - Involving greater than low risk to participants (%)	Change within 60 days to within 45 days. Update to related policies.
8/11/2022	KS4401	Compensable Workplace Injury - Claims (% of change over rolling 12 month period)	Update to related policies.
8/11/2022	SPC108	Aboriginal Workforce Participation: Aboriginal Workforce as a proportion of total workforce at all salary levels (bands) and occupations: (%)	Update to target plus context and related policies.
9/12/2022	MS1102	Childhood Obesity: Children with height/length and weight recorded	Multiple minor changes to wording
17/01/2023	IM22-004b	Incomplete Emergency Department Attendances: Aboriginal Patients who departed from an ED with a "Did not wait" or "Left at own risk" status (%)	Isolated the Aboriginal Disaggregation of an existing ED Did Not Wait Improvement Measure and upgraded it to a new KPI.
30/01/2023	KPI21-02	NSW Health First 2000 Days Implementation Strategy - Delivery of the 1-4 week health check (%)	Update to frequency of reporting
30/01/2023	KF-0061, KF-0062	Sustaining NSW Families Programs: Families completing the program when child reached 2 years of age (%) (KF-0061) Families enrolled and continuing in the program (%) (KF-0062)	Update to dates
16/02/2023	SIC108	Electronic Discharge Summaries: sent electronically and accepted by a GP Broker system (%)	Moved to Improvement Measures
22/02/2023	SPH012	Children fully immunised at one year of age (%)	Disaggregated by Aboriginal and Non-Aboriginal Children.
22/02/2023	KPI23-001	Children fully immunised at five years of age (%)	New KPI
22/02/2023	KPI23-002	Human Papillomavirus Vaccination (%) - Percentage (%) of 15 year olds receiving a course of HPV vaccine, disaggregated by: i. adolescent girls ii. adolescent boys	New KPI
02/03/2023	KS2410	Aboriginal Paediatric Patients Undergoing Otitis Media Procedures (number)	Update to footnote
14/02/2023	SSA105	Emergency Department Presentations Treated within Benchmark Times – Triage 1 to 3 (%)	Update to Triage targets
28/03/2023	SSQ114	Discharged Against Medical Advice for Aboriginal Inpatients (%)	Addition of clarifying detail to period ("as at 30th June").

Date	Indicator No.	Measure	Version Control Change
28/03/2023	KPI23-003	Dental Access Performance: Non-Admitted Dental Patients Treated on Time (%)	New KPI
17/04/2023	SSQ114	Discharged Against Medical Advice for Aboriginal Inpatients (%)	Adjustment to wording of target
26/04/2023	AI-001	Purchased Activity Volumes – Variance: Acute Admitted – NWAU (%)	Updated content for NWAU23; removed HIE criteria
26/04/2023	ED-001	Purchased Activity Volumes – Variance: Emergency Department - NWAU (%)	Updated content for NWAU23; removed HIE criteria
26/04/2023	NA-001	Purchased Activity Volumes – Variance: Non-admitted Patient - NWAU (%)	Updated content for NWAU23; removed exclusions for COVID-19 consultation clinics (Est Types 32.57 and 32.58)
26/04/2023	SA-001	Purchased Activity Volumes – Variance: Sub and non-acute admitted - NWAU (%)	Updated content for NWAU23; removed HIE criteria
26/04/2023	KS8101	Purchased Activity Volumes – Variance: Mental Health Admitted - NWAU (%)	Updated content for NWAU23; removed HIE criteria
26/04/2023	MHDA-005	Purchased Activity Volumes – Variance: Mental Health Non-Admitted - NWAU (%)	Updated content for NWAU23
26/04/2023	PH-018A	Purchased Activity Volumes – Variance: Alcohol and other Drugs (Acute Admitted) - NWAU (%)	Updated content for NWAU23; removed HIE criteria
26/04/2023	PH-018B	Purchased Activity Volumes – Variance: Alcohol and other Drugs (Non-Admitted) - NWAU (%)	Updated content for NWAU23
11/05/2023	KPI23-004	Sustainability Towards 2030: Desflurane reduction: number of vials of Desflurane purchased as a percent of all volatile anaesthetic vials purchased	New KPI
11/05/2023	KPI23-005	Sustainability Towards 2030: Nitrous Oxide Reduction: Emissions Per Admitted Patient Service Event	New KPI
16/05/2023	KPI23-002	Human Papillomavirus Vaccination (%) - Percentage (%) of 15 year olds receiving a course of HPV vaccine	Amendment to wording of indicator and numerator/denominator to reflect single measure, not disaggregation.
23/05/2023	SSA101	Emergency Treatment Performance - Admitted (%)	Removed HIE criteria
23/05/2023	KSA202	Emergency Department Extended Stays: Mental Health Presentations staying in ED > 24 hours (number)	Removed HIE criteria; updated link to SNOMED mapping file
23/05/2023	SSA105	Emergency Department Presentations Treated within Benchmark Times – Triage 1 to 3 (%)	Removed HIE criteria
23/05/2023	IM22_004b	Incomplete Emergency Department Attendances: Aboriginal Patients who departed from an ED with a "Did not wait" or "Left at own risk" status (%)	Removed HIE criteria
23/05/2023	KSA101	Transfer of Care – patients transferred from Ambulance to ED≤ 30 minutes (%)	Removed HIE criteria
23/05/2023	KS2142	Potentially Preventable Hospital Services (%)	Removed HIE criteria
23/05/2023	KS2128	Hospital Acquired Pressure Injuries (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code

Date	Indicator No.	Measure	Version Control Change
23/05/2023	KS2129	Fall-Related Injuries in Hospital – Resulting in fracture or intracranial injury (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
23/05/2023	KS2130	Healthcare Associated Infections (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
23/05/2023	KS2131	Hospital Acquired Respiratory Complications (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
23/05/2023	KS2132	Hospital Acquired Venous Thromboembolism (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
23/05/2023	KS2133	Hospital Acquired Renal Failure (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
23/05/2023	KS2134	Hospital Acquired Gastrointestinal Bleeding (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2135	Hospital Acquired Medication Complications (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2136	Hospital Acquired Delirium (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2137	Hospital Acquired Incontinence (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2138	Hospital Acquired Endocrine Complications (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2139	Hospital Acquired Cardiac Complications (Rate per 10,000 admitted patient service events)	Removed HIE criteria; updated DRG version to V11.0; identified service event type code
24/05/2023	KS2140	Third or Fourth Degree Perineal Lacerations (Rate per 10,000 admitted patient service events)	Removed HIE criteria; identified service event type code
24/05/2023	KS2141	Hospital Acquired Neonatal Birth Trauma (Rate per 10,000 admitted patient service events)	Removed HIE criteria; identified service event type code
24/05/2023	SSQ114	Discharged Against Medical Advice for Aboriginal Inpatients (%)	Removed HIE criteria
24/05/2023	SSQ106 & SSQ107	Unplanned Hospital Readmissions: all unplanned admissions within 28 days of separation (%)	Removed HIE criteria
24/05/2023	KQS206	Mental Health: Acute Seclusion Occurrence – (Episodes per 1,000 bed days)	Removed HIE criteria
24/05/2023	SSQ124	Mental Health: Frequency of Seclusion (%)	Removed HIE criteria
24/05/2023	KQS204	Mental Health Acute Post-Discharge Community Care - Follow up within seven days (%)	Removed HIE criteria

Date	Indicator No.	Measure	Version Control Change
24/05/2023	KQS203	Mental Health: Acute Readmission - within 28 days (%)	Removed HIE criteria
24/05/2023	SSQ127	Mental health: Involuntary Patients Absconded from an Inpatient Mental Health Unit – Incident Types 1 and 2 (rate per 1,000 bed days)	Removed HIE criteria
24/05/2023	PI-03	Hospital in the Home: Admitted Activity (%)	Removed HIE criteria; identified inclusion OSP Identifiers for APAC and Balmain Hospital
24/05/2023	IM21-006	Inpatient Discharge Performance: Inpatient Discharges from ED Accessible and Rehabilitation Beds by Midday (%)	Removed HIE criteria
24/05/2023	KS2410	Aboriginal Paediatric Patients Undergoing Otitis Media Procedures (number)	Removed HIE criteria
24/05/2023	KPI21-02	NSW Health First 2000 Days Implementation Strategy - Delivery of the 1-4 week health check (%)	Removed HIE criteria
26/05/2023	SSA108, SSA109, SSA110	Overdue Elective Surgery Patients (Number)	Updates to source system, numerator inclusions, exclusions and related policies; removed HIE criteria
30/05/2023	KPI23-005	Sustainability Towards 2030: Nitrous Oxide Reduction: Emissions Per Admitted Patient Service Event	Change to wording of goal
30/05/2023	KPI23-004	Sustainability Towards 2030: Desflurane reduction: number of vials of Desflurane purchased as a percent of all volatile anaesthetic vials purchased	Adjustment to exclusions wording (not change to actual exclusions).
30/05/2023	KPI23-006	Waste Streams - Resource Recovery and Diversion from Landfill (%)	New KPI
31/05/2023	KPI23-007	Energy Use Avoided Through Energy Efficiency and Renewable Energy Project Implementation (%)	New KPI
31/05/2023	KPI23-008	Passenger Vehicle Fleet Optimisation (% Cost Reduction)	New KPI
07/06/2023	KPI23-009	Use of Whole of Government and Whole of Health Contracts	New KPI
07/06/2023	KPI23-010	Reducing Off Contract Spend	New KPI
07/06/2023	KPI23-011	Reducing Free Text Orders Catalogue Compliance -Reduce free text orders in the catalogue	New KPI
07/06/2023	KSA103a, KSA103b, KSA103c	Elective Surgery Access Performance: Elective Surgery Patients Treated on Time (%)	Updates to inclusions, exclusions, numerator and denominator.
15/06/2023	KPI22-003	Renal Supportive Care Enrolment: End-Stage Kidney Disease Patient (Number)	Updates to targets.
16/06/2023			Updated all KPIs that relate to Admitted Patient Service Events and added relevant Service Event Type Code.
16/06/2023			Updated 2023-24 targets for all Hospital Acquired Complication KPIs

Date	Indicator No.	Measure	Version Control Change
16/06/2023	KS2140	Third or Fourth Degree Perineal Lacerations (Rate per 10,000 admitted patient service events)	EDW field 'SE_REQ_SRC_TYP_CD' replaced by 'SE_ADM_MODE_NHDD_CD'.
16/06/2023	KS2141	Hospital Acquired Neonatal Birth Trauma (Rate per 10,000 admitted patient service events)	EDW field 'SE_REQ_SRC_TYP_CD' replaced by 'SE_ADM_MODE_NHDD_CD'.
16/06/2023	SSQ106; SSQ107	Unplanned Hospital Readmissions: all unplanned admissions within 28 days of separation (%)	EDW field 'SE_REQ_SRC_TYP_CD' replaced by 'SE_ADM_MODE_NHDD_CD'.
22/06/2023	KMH202	Mental Health Peer Workforce Employment – Full time equivalents (FTEs) (Number)	Updated targets
22/06/2023	KS2142	Potentially Preventable Hospital Services (%)	Updated links to latest version as per AIHW (ICD10AM codes updating from 10th Edition to 11th Edition); Excluded Hospital Boarder from numerator and denominator.
27/06/2023	KS2302	Mental Health Consumer Experience: Mental Health consumers with a score of Very Good or Excellent (%)	Added JHMFHN exclusion
27/06/2023	SSQ124	Mental Health: Frequency of Seclusion (%)	Added JHMFH targets
04/07/2023	KPI21-03	Ethics Application Approvals - By the Human Research Ethics Committee within 75 calendar days - Involving greater than low risk to participants (%)	Correction to the title.
04/07/2023	KPI21-04	Research Governance Application Authorisations – Site specific Within 45 calendar days - Involving greater than low risk to participants (%)	Correction to the title.
6/7/2023	KPI21-03	Ethics Application Approvals - By the Human Research Ethics Committee within 75 calendar days - Involving greater than low risk to participants (%)	Changed back to within 90 days from within 75 days as originally advised in November 22.
6/7/2022	KPI21-04	Research Governance Application Authorisations – Site specific Within 45 calendar days - Involving greater than low risk to participants (%)	Changed back to within 60 days from within 45 days as originally advised in November 22.
17/07/2023	KQS206	Mental Health: Acute Seclusion Occurrence – (Episodes per 1,000 bed days)	Reverting to previous indicator and numerator definition
17/07/2023	KQS203	Mental Health: Acute Readmission - within 28 days (%)	Added ECT numerator exclusion; added use if CL_ID_CBK in Numerator Source
17/07/2023	KQS204	Mental Health Acute Post-Discharge Community Care - Follow up within seven days (%)	Removed SUPI comment in Numerator Source; tidied up Exclusions
27/07/2023	AI-001	Purchased Activity Volumes – Variance: Acute Admitted – NWAU (%)	Updated scope to include Small Sites
27/07/2023	ED-001	Purchased Activity Volumes – Variance: Emergency Department - NWAU (%)	Updated scope to include Small Sites
27/07/2023	SA-001	Purchased Activity Volumes – Variance: Sub and non-acute admitted - NWAU (%)	Updated scope to include Small Sites

Date	Indicator No.	Measure	Version Control Change
27/07/2023	KS8101	Purchased Activity Volumes – Variance: Mental Health Admitted - NWAU (%)	Updated scope to include Small Sites
27/07/2023	PH-018A	Purchased Activity Volumes – Variance: Alcohol and other Drugs (Acute Admitted) - NWAU (%)	Updated scope to include Small Sites
27/07/2023	MHDA-005	Purchased Activity Volumes – Variance: Mental Health Non-Admitted - NWAU (%)	Updated scope
16/08/2023	KSA103	Elective Surgery Access Performance: Elective Surgery Patients Treated on Time (%)	Removed Peritonectomy exclusion
16/08/2023	SSA108-110	Overdue Elective Surgery Patients (Number)	Removed Peritonectomy exclusion
04/09/2023	IM21-006	Inpatient Discharge Performance: Inpatient Discharges from ED Accessible and Rehabilitation Beds by Midday (%)	Added 2 bed types to the inclusions; excluded discharges from SCHN
04/09/2023	AI-001	Purchased Activity Volumes – Variance: Acute Admitted – NWAU (%)	Revised target thresholds
04/09/2023	ED-001	Purchased Activity Volumes – Variance: Emergency Department - NWAU (%)	Revised target thresholds
04/09/2023	NA-001	Purchased Activity Volumes – Variance: Non- admitted Patient - NWAU (%)	Revised target thresholds
04/09/2023	SA-001	Purchased Activity Volumes – Variance: Sub and non-acute admitted - NWAU (%)	Revised target thresholds
04/09/2023	KS8101	Purchased Activity Volumes – Variance: Mental Health Admitted - NWAU (%)	Revised target thresholds
04/09/2023	MHDA-005	Purchased Activity Volumes – Variance: Mental Health Non-Admitted - NWAU (%)	Revised target thresholds
04/09/2023	PH-018A	Purchased Activity Volumes – Variance: Alcohol and other Drugs (Acute Admitted) - NWAU (%)	Revised target thresholds
04/09/2023	MHDA-005	Purchased Activity Volumes – Variance: Mental Health Non-Admitted - NWAU (%)	Revised target thresholds
04/09/2023	PD-001	Purchased Activity Volumes – Variance: Public Dental Clinical Service - DWAU (%)	Revised target thresholds
07/09/2023	KQS203a	Mental Health: Acute Readmission - within 28 days: Aboriginal Persons (%)	New KPI 2023-24
07/09/2023	KQS204a	Mental Health Acute Post-Discharge Community Care - Follow up within seven days: Aboriginal Persons (%)	New KPI 2023-24
08/09/2023	PH-015A	Hospital Drug and Alcohol Consultation Liaison - Number of consultations (% increase)	Updated baseline and reporting years in target; Added denominator
24/10/2023	KS2128	Hospital Acquired Pressure Injuries (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2129	Fall-Related Injuries in Hospital – Resulting in fracture or intracranial injury (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2130	Healthcare Associated Infections (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2131	Hospital Acquired Respiratory Complications (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24

Date	Indicator No.	Measure	Version Control Change
24/10/2023	KS2132	Hospital Acquired Venous Thromboembolism (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2133	Hospital Acquired Renal Failure (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2134	Hospital Acquired Gastrointestinal Bleeding (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2135	Hospital Acquired Medication Complications (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2136	Hospital Acquired Delirium (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2137	Hospital Acquired Incontinence (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2138	Hospital Acquired Endocrine Complications (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2139	Hospital Acquired Cardiac Complications (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2140	Third or Fourth Degree Perineal Lacerations (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24
24/10/2023	KS2141	Hospital Acquired Neonatal Birth Trauma (Rate per 10,000 admitted patient service events)	Updated with link to finalised HAC targets for 2023-24

# TABLE OF CONTENTS

VERSION CONTROL	3
Table of Contents	11
INTRODUCTION TO KEY PERFORMANCE INDICATOR TARGETS AND IMPROVEMENT MEASURES	15
KEY PERFORMANCE INDICATORS FOR 2023-24	17
HEALTH STRATEGIC OUTCOME 1: Patients and carers have positive	
experiences and outcomes that matter	18
Overall Patient Experience Index – adult admitted patients (Number)	18
Patient Engagement Index – adult admitted patients (Number)	21
Overall Patient Experience Index – ED patients (Number)	24
Patient Engagement Index – ED patients not admitted to hospital (Number)	28
Mental Health Consumer Experience: Mental Health consumers with a score of Ve Good or Excellent (%)	
<b>HEALTH STRATEGIC OUTCOME 2: Safe care is delivered across all setting</b>	s34
Emergency Treatment Performance - Admitted (%)	34
Emergency Department Extended Stays: Mental Health Presentations staying in E hours (number)	
Emergency Department Presentations Treated within Benchmark Times – Triage 1 (%)	
Incomplete Emergency Department Attendances: Aboriginal Patients who departe from an ED with a "Did not wait" or "Left at own risk" status (%)	
Transfer of Care – patients transferred from Ambulance to ED≤ 30 minutes (%)	48
Potentially Preventable Hospital Services (%)	52
Hospital Acquired Pressure Injuries (Rate per 10,000 admitted patient service ever Fall-Related Injuries in Hospital – Resulting in fracture or intracranial injury (Rate per 10,000 admitted patient service events)	·
Healthcare Associated Infections (Rate per 10,000 admitted patient service events	)64
Hospital Acquired Respiratory Complications (Rate per 10,000 admitted patient se events)	
Hospital Acquired Venous Thromboembolism (Rate per 10,000 admitted patient seevents)	
Hospital Acquired Renal Failure (Rate per 10,000 admitted patient service events)	73
Hospital Acquired Gastrointestinal Bleeding (Rate per 10,000 admitted patient servevents)	
Hospital Acquired Medication Complications (Rate per 10,000 admitted patient ser events)	
Hospital Acquired Delirium (Rate per 10,000 admitted patient service events)	83
Hospital Acquired Incontinence (Rate per 10,000 admitted patient service events).	86

Hospital Acquired Endocrine Complications (Rate per 10,000 admitted patient service events)89
Hospital Acquired Cardiac Complications (Rate per 10,000 admitted patient service events)92
Third or Fourth Degree Perineal Lacerations (Rate per 10,000 admitted patient service events)95
Hospital Acquired Neonatal Birth Trauma (Rate per 10,000 admitted patient service events)98
Discharged Against Medical Advice for Aboriginal Inpatients (%) 101
Elective Surgery Access Performance: Elective Surgery Patients Treated on Time (%)104
Overdue Elective Surgery Patients (Number)108
Unplanned Hospital Readmissions: all unplanned admissions within 28 days of separation (%):
Mental Health: Acute Seclusion Occurrence – (Episodes per 1,000 bed days) 115
Mental Health: Acute Seclusion Duration – Average (Hours) 118
Mental Health: Frequency of Seclusion (%)120
Mental Health Acute Post-Discharge Community Care - Follow up within seven days (%)
Mental Health: Acute Readmission - within 28 days (%)
Mental health: Involuntary Patients Absconded from an Inpatient Mental Health Unit – Incident Types 1 and 2 (rate per 1,000 bed days)
Virtual Care Access: Non-admitted services provided through Virtual Care (%) 131
Hospital in the Home: Admitted Activity (%)134
Renal Supportive Care Enrolment: End-Stage Kidney Disease Patient (Number) 136
Inpatient Discharge Performance: Inpatient Discharges from ED Accessible and Rehabilitation Beds by Midday (%)140
Dental Access Performance: Non-Admitted Dental Patients Treated on Time (%) 143
HEALTH STRATEGIC OUTCOME 3: People are healthy and well145
Mental Health Peer Workforce Employment – Full time equivalents (FTEs) (Number) 145
Smoking during pregnancy - At any time: (Number)148
Get Healthy Information and Coaching Service – Get Healthy in Pregnancy Referrals (% variance from target)
Children fully immunised at one year of age (%)154
Hospital Drug and Alcohol Consultation Liaison - Number of consultations (% increase)
Hepatitis C Antiviral Treatment Initiation – Direct acting - by District residents (% Variance from Target)
Aboriginal Paediatric Patients Undergoing Otitis Media Procedures (number) 162
Pregnant Women Quitting Smoking - By the second half of pregnancy (%)
NSW Health First 2000 Days Implementation Strategy - Delivery of the 1-4 week health check (%)

Childhood Obesity: Children with height/length and weight recorded in inpatient settings (%)	172
Domestic Violence Routine Screening – Routine Screens conducted (%)	
Sustaining NSW Families Programs:	
Breast Screen Participation Rates:	
Children fully immunised at five years of age (%)

# INTRODUCTION TO KEY PERFORMANCE INDICATOR TARGETS AND IMPROVEMENT MEASURES

The NSW Performance Framework (PF) applies to the 15 geographical NSW Local Health Districts, the Ambulance Service NSW, Sydney Children's Hospitals Network, the St Vincent's Health Network, the Justice Health and Forensic Mental Health Network. In this document, these organisations are referred to collectively as Health Services, except where particular reference to Local Health Districts is required.

The definitions provided in this document will assist Health Services and other data users with the calculation and interpretation of the Key Performance Indicators referenced in the Service Agreements for 2023-24. It should be noted that some KPIs may be calculated differently when applied to different purposes outside the management of the Service Agreements. The KPIs contained in this document have been defined specifically with the intent to meet the reporting requirements under 2023-24 agreements and to align to the Ministry of Health's monthly performance monitoring reports. Should you require further assistance with the definitions or have comments regarding them please contact either the System Information & Analytics Branch or the Data/Policy contacts listed in the KPI documentation.

The Service Agreement is a key component of the Performance Framework for Health Services – providing a clear and transparent mechanism for assessment and improvement of performance. The Service Agreement document only covers KPIs.

**Key Performance Indicators (KPIs),** if not met, may contribute to escalation under the Performance Framework processes. Performance against these KPIs will be reported regularly to Health Services in the Health System Performance Report prepared by System Information & Analytics Branch at the Ministry of Health.

Improvement Measures (IMs): A range of Improvement Measures are included in a separate data supplement to assist the organisation to improve provision of safe and efficient patient care and to provide the contextual information against which to assess performance. These are NOT part of the agreed Service Agreements, and therefore are NOT for the purposes of performance management. They are included as an addendum in that document. Improvement Measures are reported regularly to Health Services by a range of stakeholders including Ministry Branches, Pillars and Shared Service providers. System Information & Analytics Branch will provide information to Health Services around where information on Improvements Measures can be accessed.

Note that the KPIs and Improvement Measures listed above are not the only measures collected and monitored by the NSW Health System. A range of other measures are used for a variety of reasons, including monitoring the implementation of new service models, reporting requirements to NSW Government central agencies and the Commonwealth, and participation in nationally agreed data collections. Relevant measures specified by the National Health Performance Authority, and in the *Premier's Priorities* and *State Priorities*, have been assigned as NSW Health KPIs or Improvement Measures, as appropriate.

The KPIs and Improvement Measures are aligned with the six Strategic Health Outcomes identified in the NSW Health Strategic Outcome and Business Plan:

- 1. Patients and carers have positive experiences and outcomes that matter
- 2. Safe care is delivered across all settings
- 3. People are healthy and well
- 4. Our staff are engaged and well supported
- 5. Research and innovation, and digital advances inform service delivery
- 6. The health system is managed sustainably

The performance of Districts, Networks, other Health Services and Support Organisations is assessed in terms of whether it is meeting performance targets for individual key performance indicators for each NSW Health Strategic Priority.

✓	Performing	Performance at, or better than, target
7	Underperforming	Performance within a tolerance range

X Not performing Performance outside the tolerance threshold

Detailed specifications for the key performance indicators are provided in this Service Agreement Data Supplement along with Improvement Measures (in Part 2) that will continue to be tracked by the Ministry's Business Owners. Performance concerns will be raised with the Organisation for focused discussion at performance review meetings in line with the NSW Health Performance Framework.

This Data Supplement includes indicators and measures that align to key strategic programs, including:

- Safety and Quality Framework
- Better Value Care
- Mental Health Reform

Key deliverables under the Ministry's Business Plan will also be monitored, noting that process key performance indicators and milestones are held in the detailed Operational Plans developed by each Health Service and Support Service.

As in previous years, the 2023-24 KPI and Improvement Measures data supplement is also located on the NSW Health Information Resource Directory and accessible via the following link:

http://hird.health.nsw.gov.au/hird/view\_data\_resource\_description.cfm?ItemID=47648

# KEY PERFORMANCE INDICATORS FOR 2023-24

HEALTH OUTCOME 1: Patients and carers have positive experiences and outcomes that matter

# **HEALTH STRATEGIC OUTCOME 1: Patients and carers have positive experiences and outcomes that matter**

Patient Experience Index

**INDICATOR: KS2301** 

Previous IDs: SSQ117, 9A20,

9A21

Scope

Overall Patient Experience Index – adult admitted patients (Number)

Patient Experience Survey index of adult admitted patients of four scored questions on overall rating of care, rating of staff, rating of organised care,

and speaking highly of care to family and friends.

Shortened Title
Service Agreement Type

**NSW Health Strategic Outcome** 

Key Performance Indicator

1: Patients and carers have positive experiences and outcomes that

matter

Status Final Version number 1.2

Sample of adult patients who are admitted to hospitals in peer groups A1, A3, B1, B2, C1 and C2. These hospitals contribute to the LHD total in proportion to the total number of admitted patients for all A1, A3, B1, B2,

C1 and C2 hospitals in that LHD.

**Goal** Improve patients' experience of care

**Desired outcome** Increase LHD results for an index of four patient-reported experience

measures (PREMs) on overall patient experience (maximum possible

score 10)

**Primary point of collection** Postal survey of recent adult admitted patients, with up to two reminders

and alternative completion online and by phone (in up to 140 different

languages)

Data Collection Source/System NSW Patient Survey Program data

Primary data source for analysis Weighted responses to Adult Admitted Patient Survey

Indicator definition The weighted average patient experience index across all patients with a

valid response within the reporting period.

**Numerator** 

Numerator definition The sum of patient experience indices for all patients.

Each patient's index is calculated using the sum of scores to each of the four following questions divided by number of questions where a valid response was recorded for a patient:

 How would you rate how well the health professionals worked together?

Very good (10); Good (7.5); Neither good nor poor (5); Poor

(2.5); Very poor (0)

How well organised was the care you received in hospital?

# HEALTH OUTCOME 1: Patients and carers have positive experiences and outcomes that matter

Very well organised (10); Fairly well organised (5); Not well organised (0)

 Overall, how would you rate the care you received while in hospital?

Very good (10); Good (7.5); Neither good nor poor (5); Poor (2.5); Very poor (0)

• If asked about your hospital experience by friends and family how would you respond?

I would speak highly of the hospital (10); I would neither speak highly nor be critical (5); I would be critical of the hospital (0).

Missing values excluded from calculation. Respondent must have at least one valid response for the four questions.

Data are weighted to represent the age and stay type (overnight or same day) profile of patients at each hospital.

Numerator source

NSW Patient Survey Program data

Numerator availability

Available

#### **Denominator**

Denominator definition

Total number of patients with at least one valid response for the four questions (as specified in the list of response options under 'numerator'). Data are weighted to represent the age and stay type (overnight or same day) profile of patients at each hospital.

Denominator source

NSW Patient Survey Program data

Denominator availability

Available

#### **Inclusions**

All patients surveyed during the target period.

- Facilities in peer groups A1, A3, B1, B2, C1 and C2
- Patients aged 18 years or older from Jan 2014 onwards
- Valid Australian postal address

#### **Exclusions**

As per inclusions above

- Same day admissions less than 3 hours
- Same day episodes with a mode of separation of transfer
- Maternity admissions (incl. stillbirths, miscarriages and termination of pregnancy procedures)
- Patients treated for contraceptive management
- Haemodialysis patients
- Admitted patients treated in a mental health setting
- Maltreatment codes (incl. sexual and physical abuse)
- Patients that have died

For full details on exclusion criteria and diagnostic/procedure codes used, refer to the *Technical Supplement: Adult Admitted Patient Survey* at:

http://www.bhi.nsw.gov.au/nsw patient survey program

# HEALTH OUTCOME 1: Patients and carers have positive experiences and outcomes that matter

**Targets** 

Target score of 8.7 out of 10.0

- Not performing <8.5</li>
- Underperforming ≥8.5 to <8.7</li>
- Performing organisational score ≥8.7

**Context**Health services should not only be of good clinical quality but should also

provide a positive experience for the patient.

**Numerator** 

Numerator definition The sum of engagement indices for all patients.

> Each patient's index is calculated using the sum of scores of the following six questions divided by number of questions where a valid response was

recorded for a patient:

During your stay in hospital, how much information about your condition was given to you?

Not enough (0); The right amount (10); Too much (5)

Were you involved, as much as you wanted to be, in decisions about your care?

Yes, definitely (10); Yes, to some extent (5); No (0)

Did you feel involved in decisions about your discharge from hospital?

Yes, definitely (10); Yes, to some extent (5); No (0)

# HEALTH OUTCOME 1: Patients and carers have positive experiences and outcomes that matter

 At the time you were discharged, did you feel that you were well enough to leave hospital?

Yes (10); No (0)

Were you given enough information about how to manage your care at home?

Yes, completely (10); Yes, to some extent (5); No, I was not given enough (0)

 Did staff tell you who to contact if you were worried about your condition after you left?

Yes (10); No (0).

Missing values excluded from calculation. Respondent must have at least one valid response in for the six questions.

Data are weighted to represent the age and stay type (overnight or same day) profile of patients at each hospital.

Scope NSW public specialized inpatient and community mental health services.

Goal To improve experience and outcomes in mental health care

**Desired outcome**More than 80% of mental health consumers report a Very Good or

Excellent overall experience.

**Primary point of collection** Your Experience of Service (YES) questionnaire

Data Collection Source/System NSW YES surveys distributed by LHDs/SHNs reported to NSW YES

Collection maintained by InforMH, System Information and Analytics

Branch

Primary data source for analysis NSW YES collection

Indicator definition NSW or LHD/SHN percentage is the average of percentages calculated

separately for inpatient and community settings. Within each setting, score is the average of Percent of completed YES questionnaires with overall Experience score in the Very Good to Excellent range.

Calculation method is: 100 \* (Numerator 1/Denominator 1 + Numerator

2 /Denominator 2)/2.

#### **Numerator**

Numerator definition

- The number of valid YES questionnaires with overall Experience score in the Very Good to Excellent range (≥ 8/10) in inpatient settings
- The number of valid YES questionnaires with overall Experience score in the Very Good to Excellent range (≥ 8/10) in community settings

Overall Experience score is the average score of validly completed YES questions 1-22, expressed as a score out of 10.

Numerator source YES Collection

Numerator availability Quarterly

**Denominator** 

Denominator definition 1. The total number of valid YES questionnaires received in

inpatient settings.

# HEALTH OUTCOME 1: Patients and carers have positive experiences and outcomes that matter

2. The total number of valid YES questionnaires received in community settings.

Denominator source YES Collection

Denominator availability Quarterly

**Inclusions** All YES questionnaires included in reference period

• No valid service identification.

 YES questionnaires where <12 of questions 1-22 were completed.

LHD/SHN service settings (inpatient/community) with <10 YES

questionnaires returned in the quarter.

Health Outcome 2: Safe care is delivered across all settings

#### **HEALTH STRATEGIC OUTCOME 2: Safe care is delivered across all settings**

**INDICATOR: SSA101** Emergency Treatment Performance - Admitted (%)

**Previous IDs:** Previously known as:

Patients with Total time in ED ≤ 4hrs: Admitted (to a ward/ICU/theatre from

ED) (%)

**Shortened Title** Emergency Treatment Performance - Admitted

Key Performance Indicator **Service Agreement Type** 

**NSW Health Strategic Outcome** 2: Safe care is delivered across all settings

**Status** Final Version number 4.41

Scope All emergency presentations which were admitted to a ward, to ICU or to

theatre from ED.

Goal To improve access to public hospital services

**Desired outcome** Improved patient satisfaction

Improved efficiency of Emergency Department services

Primary point of collection **Emergency Department Clerk** 

**Data Collection Source/System Emergency Department Data Collection** 

Primary data source for analysis EDW (FACT\_ED\_SE)

Indicator definition The percentage of ED patients who were subsequently admitted to the same hospital, whose clinical care in the ED has ceased as a result of their

physically leaving the ED, and whose ED stay length is  $\leq 4$  hours.

ED stay length is calculated as subtracting presentation date/time from ED

physical departure date/time, where:

Presentation date/time in the ED is the time and date of the first recorded contact with an emergency department staff member. The first recorded contact can be the commencement of the clerical

registration or triage process, whichever happens first (i.e., the earlier of CL ARRIVAL DTTM or SUB EVNT FIRST TRIAGE DTTM) and:

**Departure date/time** is measured using the following business rules:

If the patient is subsequently admitted to this hospital (either short stay unit, hospital-in-the-home or non-emergency department hospital ward), then record the time the patient leaves the emergency department to go to the admitted patient facility. For NSW, this corresponds to EDW Mode of Separation codes '01', '01.03', '01.04' or '01.05), and is calculated using the "Actual Departure Date and Time" field in source systems

(CL DEPART DTTM).

#### Health Outcome 2: Safe care is delivered across all settings

**NOTE:** For the purposes of **this** Measure, an *ED presentation* is defined as the totality of an ED visit, from the time and date of the first recorded contact with an emergency department staff member to the point where the visit has concluded and the clinical care in the ED has ceased.

#### **Numerator**

Numerator definition All patients, whose actual departure date (CL DEPART DTTM) falls within

> the reporting period, and who have a length of stay from presentation time to actual departure time of less than or equal to 4 hours, and who are admitted to a ward, to ICU or to theatre from ED, as represented by one of

the following separation modes: EDW: '01', '01.03', '01.04' or '01.05'

EDW (Emergency Department Data Collection) Numerator source

Numerator availability Available

Denominator

Denominator definition The total number of emergency department presentations who were

> admitted to a ward, to ICU or to theatre from ED, where the actual departure date (CL\_DEPART\_DTTM) falls within the reporting period.

Denominator source EDW (Emergency Department Data Collection)

Denominator availability Available

**Inclusions** 

All patients presenting to the emergency department at facilities that currently provide patient episode data to the non-admitted patients ED minimum data collection

- All patients that departed during the reporting period
- Only records where "Presentation time" (i.e. triage or arrival time) and actual Departure date/time are present.
- The following EDW Emergency Department Modes of Separation values are included in calculation:
  - 01 Formally admitted, not further defined
  - 01.03 Formally admitted to admitted patient ward, not elsewhere classified
  - 01.04 Formally admitted to operating theatre suite
  - 01.05 Formally admitted to admitted patient critical care unit

**Exclusions** 

- Records where total time in ED is missing, less than zero or greater than 99,998 minutes
- EDW Visit type (ED VIS TYPE CD) of '12' or '13', i.e. Telehealth presentation, current admitted patient presentation
- EDW Separation mode (ED SEPR MODE CD) = '98') i.e. Registered in error
- Duplicate with same facility, MRN, arrival date, arrival time and birth date (EDW: OSP\_CBK, CL\_ID, CL\_ARRIVAL\_DTTM and CL\_DOB)

#### Health Outcome 2: Safe care is delivered across all settings

Targets 50%

Performing: ≥50

Underperforming: ≥43 to <50</li>

• Not performing: <43

Indicator definition

## Health Outcome 2: Safe care is delivered across all settings

#### ICD10AM:

- First three characters "F20"-"F51" or "F53"-"F63" or "F65"-"F69" or "F80"-"F99" or "R44"-"R45" or "X60"-"X84");
- For codes with first two characters "F1", include only those of form "F1n.5" where n is an integer 0-9.

**SNOMED CT** (mapped to ICD10AM V12), using the SNOMED ED Ref Set to ICD10AM 12th Edition Mappings table as stored in the HIRD:

http://hird.health.nsw.gov.au/hird/ext\_info\_uploads/SNOMED%20ED%20Refere\_nce%20Set%20to%20ICD10AM%20V12%20Mapping%20(2023-24).xlsx

**NOTE:** For the purposes of **this** Measure, an *ED presentation* is defined as the totality of an ED visit, from the date and time of Triage (or arrival time if missing) to the point where the visit has concluded and the clinical care in the ED has ceased.

**Data Availability** 

Available. Note that some systems include the decimal point in the ICD9

diagnosis code, and some do not.

Inclusions

Mental health patients as identified using ED principal diagnosis codes ICD

9CM, ICD 10AM and SNOMED CT.

Emergency type visits (ED\_VIS\_TYPE\_CD = '01', '03', '11').

Lower /upper age limit – all ages.

**Exclusions** 

#### Excludes:

- Departure status was Did not wait, Left at own risk or Dead on arrival i.e. EDW: ED\_SEPR\_MODE\_CD = '02.03', '02.04', '03' and '98'
- Records with negative or missing length of stay.

**Targets** 

- Target: 0 (zero / nil) presentations during a month
- Not performing: >5 presentations during a month
- Under performing: ≥ 1 and ≤5 presentations during a month.

Context

Timely admission to a hospital bed, for those Emergency Department patients who require inpatient treatment, contributes to patient comfort and improves outcomes and the availability of Emergency Department services for other patients.

**Emergency Department Clerk** 

**Emergency Department Data Collection** 

EDW (FACT\_ED\_SE)

The triage performance is the percentage of presentations where commencement of clinical care is within national performance indicator thresholds for the first assigned triage category as follows:

**Triage category 1**: seen within seconds, calculated as less than or equal to 2 minutes

**Triage category 2**: seen within 10 minutes **Triage category 3**: seen within 30 minutes where:

- Presentation time is the triage date/time (SUB\_EVNT\_FIRST\_TRIAGE\_DTTM). If the triage time is missing it is the arrival date/time (CL\_ARRIVAL\_DTTM) and;
- Commencement of clinical care is the earliest of first seen clinician date/time or first seen nurse date/time (earliest of SUB\_EVNT\_FIRST\_NURSE\_PROTOCOL\_DTTM, SUB\_EVNT\_FIRST\_NURSE\_PRAC\_SEEN\_DTTM, SUB\_EVNT\_FIRST\_DOC\_SEEN\_DTTM, or SUB\_EVNT\_FIRST\_PHYSICIAN\_SEEN\_DTTM)

#### Notes:

 Where a patient changes triage category while waiting for treatment (re-triage), the originally assigned triage category is to be used for the purposes of calculating performance against this service measure.

## Health Outcome 2: Safe care is delivered across all settings

 For the purposes of this Measure, an ED presentation is defined as the totality of an ED visit, from the date and time of Triage (or arrival time if missing) to the point where the visit has concluded and the clinical care in the ED has ceased.

#### **Numerator**

Numerator definition

The number of presentations within the originally assigned triage category where the time between presentation time and commencement of clinical care is within performance indicator thresholds for the relevant Triage category, where the actual departure date (CL\_DEPART\_DTTM) falls within the reporting period.

Numerator source

EDW (Emergency Department Data Collection)

Numerator availability

Available

#### Denominator

Denominator definition

The total number of presentations in each triage category, where the actual departure date (CL\_DEPART\_DTTM) falls within the reporting period.

Denominator source

Denominator availability

#### Available

#### **Inclusions**

- Only records where Presentation time, and clinical care commenced time are present
- Emergency visit type (ED\_VIS\_TYPE\_CD = '01', '03', '11') i.e.
   Emergency presentation, unplanned return visit for continuing condition or disaster
- Triage category (ED\_TRIAGE\_CD) in ('1','2','3')

#### **Exclusions**

- Records where waiting time in ED is missing or greater than 99,998 minutes
- Separation mode in (ED\_SEPR\_MODE\_CD in '02.03', '03' or '98') i.e. registered in error, did not wait or dead on arrival
- Duplicate with same facility, MRN, arrival date, arrival time and birth date (EDW: OSP\_CBK, CL\_ID, CL\_ARRIVAL\_DTTM and CL\_DOB)

## **Targets**

#### Performing:

- Triage Category 1 = 100%
- Triage Category 2 ≥ 80%
- Triage Category 3 ≥ 75%

#### Underperforming:

- Triage Category 1 = N/A
- Triage Category 2 ≥ 70% <80%
- Triage Category 3 ≥ 65% <75%</li>

## Not Performing:

- Triage Category 1 <100%</li>
- Triage Category 2 <70%</li>

### Health Outcome 2: Safe care is delivered across all settings

Triage Category 3 <65%</li>

Context

Triage aims to ensure that patients commence clinical care in a timeframe appropriate to their clinical urgency and allocates patients into one of the 5 triage categories.

The accuracy of triage is the core process of clinical services and determining of clinical urgency for treatment. Triage categorisation is required to identify the commencement of the service and the calculation of waiting times.

- Not performing: Increase on previous year.

#### Context

Incomplete Emergency Department Attendances (IEDA) comprise Emergency Department presentations where a person who leaves the ED before treatment is commenced or who leaves after treatment has commenced, against advice. IEDA is an indication of how culturally and clinically safe Emergency Department services are for the Aboriginal community they serve, and a reflection of Aboriginal peoples' satisfaction with their care. The underlying causes of IEDA can be broad and may begin outside the healthcare system. This can include factors related to the broader health institution, such as systemic racism, or the individual interactions within that healthcare system like communication breakdown between doctor and patient.

Transfer of Care

Key Performance Indicator

2: Safe care is delivered across all settings

Final 3.5

All patients arrived by NSW Ambulance to an Emergency Department.

Timely transfer of patients from ambulance to the emergency department, resulting in improved health outcomes and patient satisfaction, as well as improved ambulance operational efficiency

- Ensure co-ordination between NSW Ambulance and emergency departments
- Improve ambulance availability
- Ensure timely access to hospital services for patients

Operator, Computer Aided Dispatch (CAD) system, ED staff

Ambulance Service, NSW (ASNSW) Operator, Computer Aided Dispatch (CAD) system, and Emergency Department System (EDIS, iPM ED, Cerner FirstNet, Health eCare and IBA)

Ambulance Transfer of Care Reporting System

The percentage of patients arriving by ambulance whose care is transferred from ambulance paramedic to ED clinician within 30 minutes of arrival.

The 'Transfer of Care' time is the time interval measured in minutes between:

- Start time: the arrival time of the patient in the ambulance zone (recorded in the ambulance system as the start time) and
- End time: the arrival time of the patient in the ED treatment zone and their handover from ambulance paramedic to ED clinician (recorded in the ED IT system as treatment location arrival time)

**NOTE:** Triage of Ambulance patients arriving to the ED and the steps for Transfer of Care can be found in the Policy Directive PD2013\_47.

Transfer of Care is defined as the transfer of accountability and responsibility for a patient from an ambulance paramedic to an ED clinician.

Transfer of Care is deemed complete only when clinical handover has occurred between hospital staff and paramedics, the patient has been offloaded from the ambulance stretcher and/or the care of the ambulance paramedics is no longer required.

**Ambulance Zone** = ambulance bay where ambulance vehicle arrives outside Hospital doors

### Health Outcome 2: Safe care is delivered across all settings

**ED Treatment Zone** = bed/chair inside the ED (care assumed by ED clinician) or chair in the waiting room (care assumed by ED clinical staff managing the waiting room area).

#### **Numerator**

Numerator definition Patients arrived by ambulance and waited less than or equal to 30

minutes for care to be transferred from an ambulance paramedic to an ED

Ambulance record with no matching ED record (i.e. unmatched records)

• Transfer of Care Time > 600 minutes

- Incorrect data entered into ED system
- Missing ambulance data due to CAD outage
- NEPT booked transport
- Multiple patients in one ambulance only one patient is matched

**Targets** 

Target: Greater than or equal to 90% within 30 minutes

- Not performing: <80% within 30 minutes
- Under performing: ≥ 80% and < 90% within 30 minutes</li>

Context

Timely access to care in emergency departments can lead to better health outcomes for patients and reduce or avoid hospital stays. Better coordination of the handover process of patients between ambulance services and hospitals:

- Contribute to the timeliness of ambulance patients accessing definitive care, and
- Reduce the time taken for ambulance turnaround at hospital, improving resource availability

### Health Outcome 2: Safe care is delivered across all settings

Health Outcome 2: Safe care is delivered across all settings

## INDICATOR: KS2142 Potentially Preventable Hospital Services (%)

Shortened Title Potentially Preventable Hospital Services

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 2: Safe care is delivered across all settings

Status Final Version number 1.2

Scope All Emergency Department presentations and Admitted Patient episodes of

care in NSW public hospitals

**Goal**To reduce preventable visits to hospital by five per cent through to 2023 by

caring for people in the community

**Desired outcome**• Improved patient care experience and satisfaction

Improved efficiency of Hospital services

• Strengthen the care provided to people in the community

Keep people healthier in the long-term

Primary point of collection Patient Medical Record and Emergency Department Clerk

**Data Collection Source/System**Admitted Patient Data Collection and Emergency Department Data

Collection

Primary data source for analysis Enterprise Data Warehouse (EDW)

Indicator definition Proportion of Emergency Department attendances or Admitted patient bed

days for people with conditions where hospitalization or ED visit is potentially

preventable.

**Numerator** 

Numerator definition

The numerator is the total number of ED service events or days spent in hospital by people with conditions where hospitalisation is potentially

preventable. This is the sum of two broad categories:

 Admitted patient component: days spent in hospital by discharged patients admitted with a potentially preventable condition.
 Potentially preventable conditions include conditions defined by AIHW, which are described at the AIHW's METEOR website:

https://meteor.aihw.gov.au/content/740851

• ED component: number of Triage category 4 and 5 presentations to

emergency departments

Numerator source EDW (Admitted Patient Data Collection and Emergency Department Data

Collection)

Numerator availability Available

Denominator

### Health Outcome 2: Safe care is delivered across all settings

Denominator definition Total number of days of admitted patient care for patients discharged in the

reporting period, plus the total number of emergency department

presentations during the reporting period.

Denominator source EDW (Admitted Patient Data Collection and Emergency Department Data

Collection)

Denominator availability Available

Inclusions

• ED component: All patients presenting to the emergency department, with a departure date within the reporting period.

 Admitted Patient component: all admitted patient service events (SE\_TYPE\_CD = '2') that were completed in NSW public hospitals

during the reporting period.

• ED component: both numerator and denominator counts exclude:

 Visit types (ED\_VIS\_TYPE\_CD) = 6, 12 and 13) (Prearranged Admission: Without ED Workup, telehealth presentations and current admitted patient presentations, respectively);

 Mode of separation (ED\_SEPR\_MODE\_CD) = '98' for registered in error;

Vic-in-Reach LHD (Albury Hospital) (OSP ID = 1000921)

• Admitted patient component of the numerator excludes:

 Unit type
 ([FIRST\_HEALTH\_SERVICE\_WARD\_ATTRIBUTE\_PRO FILE].[HEALTH\_SERVICE\_WARD\_PRIMARY\_BED\_TYP E\_CD]) is 17 or 58 and no other episodes in that service encounter (ED Only)

Service category type 2 (Rehabilitation)(SE\_SERVICE\_CATEGORY\_CD = 2)

Bed type on admission 25, 26 or 28 (Hospital in the Home)
 (HEALTH\_SERVICE\_WARD\_PRIMARY\_BED\_TYPE\_CD = 25, 26 or 28)

OSP health organisation identifier = 3015234

o OSP LHD identifier is 1000170 or 1000921

Admitted patient service event length of stay > 120 days

Hospital boarder (SE SERVICE CATEGORY CD = '0')

Admitted patient component of the denominator excludes:

 Unit type
 ([FIRST\_HEALTH\_SERVICE\_WARD\_ATTRIBUTE\_PRO FILE].[HEALTH\_SERVICE\_WARD\_PRIMARY\_BED\_TYP E\_CD]) is 17 or 58 and no other episodes in that service encounter (ED Only)

OSP LHD identifier is 1000170 or 1000921

Hospital boarder (SE SERVICE CATEGORY CD = '0')

#### **Targets**

#### **53** | Page

**Exclusions** 

### Health Outcome 2: Safe care is delivered across all settings

Performance targets are set relative to the benchmark percentage in the previous year for the LHD

- Performing: 2% lower than benchmark (≤98% of individual benchmark percentage in the previous year)
- Under Performing: within 2% of benchmark (>98% and ≤102% of individual benchmark the previous year)
- Not Performing: 2% higher than benchmark (≥102% of individual benchmark the previous year)

Context

Supporting patients in the community using integrated approaches to care has demonstrated reductions in unnecessary hospital visits by delivering care closer to home.

Focusing on preventative healthcare in the community also helps people stay as healthy as possible for as long as possible while ensuring the hospital system operates as efficiently as possible.

The Premier's Priority aims to reduce potentially preventable visits to hospital by five per cent through to 2023 for people who can safely receive their care in the community.

Health Outcome 2: Safe care is delivered across all settings

**INDICATOR: KS2128** 

Hospital Acquired Pressure Injuries (Rate per 10,000 admitted patient service events)

Previous IDs: KS2114, KQS205

Stage 3, 4, unspecified hospital acquired pressure injuries, unstageable and suspected deep tissue injury. – (Rate per 10,000 admitted patient

service events)

Shortened Title Hospital Acquired Pressure Injuries

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 2: Safe care is delivered across all settings

Status Final Version number 1.21

Scope All patients admitted to public hospitals in NSW

Goal To minimize the number and severity of hospital acquired pressure

injuries in NSW public health facilities through promotion of a

comprehensive, systematic approach to pressure injury prevention and

management.

**Desired outcome** Improved quality and safety processes by timely risk assessment which

guides prevention strategies and management of existing pressure injuries, resulting in a reduction in the number and severity of hospital

acquired pressure injuries.

Primary point of collection Patient Medical Record

Data Collection Source/System Admitted Patient Data Collection

Primary data source for analysis EDW

Indicator definition The rate of completed admitted patient service events with stage 3 or 4.

or unspecified, or unstageable, or deep tissue hospital acquired pressure

injuries per 10,000 admitted patient service events.

**Numerator** 

Numerator definition Total number of admitted patient service events (SE\_TYPE\_CD = '2')with

separation dates in the reporting period, and with at least one of the ICD-10-AM codes listed in the Australian Commission on Safety and Quality in Health Care's (ACSQHC) HACs specification file for HACs V 3.1 (April

2022 release) downloadable from

https://www.safetyandguality.gov.au/publications-and-

resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31 for the numerator for hospital acquired pressure injuries (HAC 1). The 12<sup>th</sup> Edition of ICD-10-AM coding should be used, which includes the following additional diagnosis codes:

- Any of the listed ICD-10-AM 12<sup>th</sup> Edition codes recorded as an additional diagnosis.
- AND condition onset flag code of 1.
- AND satisfying the criteria for the denominator

### Health Outcome 2: Safe care is delivered across all settings

 For analysis relating to newborns with qualified days includes separations with any of specified ICD-10-AM codes as either the principal diagnosis or an additional diagnosis.

For one inpatient service event, one type of HAC is only counted at most once if multiple diagnoses of the HAC are identified.

#### Denominator

Denominator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation dates in the reporting period, excluding inpatient service events with any of the following:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE START DTTM = SE END DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE SERVICE CATEGORY CD = '9'.

Denominator source

EDW

Denominator availability

Available

Inclusions

All admitted patient service events in NSW public hospitals

Note: Mental health and drug and alcohol admitted patient service events are included in the current version (ACSQHC HAC V3.1).

**Exclusions** 

Numerator exclusion:

Admitted patient service events with the qualified diagnosis codes recorded as the principal diagnosis code.

Numerator and denominator exclusions:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

### **Targets**

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12-month rolling period (12

### Health Outcome 2: Safe care is delivered across all settings

months to date). Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is less than 1.

Context

Hospital-acquired pressure injuries extend the length of hospitalisation, which impacts on patients and their families. These injuries also increase the cost of admission incurred by the health service. This additional cost may be the result of an increased length of stay or more complex care requirements. While there is an increased financial cost, the most significant cost is the pain and discomfort experienced by the patient.

Significant reductions in pressure injury rates are being achieved in some hospitals through preventive initiatives. Related information can be found

- Any uncoded records.

#### **Targets**

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12-month rolling period (12 months to date). Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is less than 1.

## Health Outcome 2: Safe care is delivered across all settings

A hospital-acquired infection often also results in a prolonged hospital stay which impacts on patients and their families. These infections increase the cost of admission incurred by the health service. This additional cost may be the result of an increased length of stay or more complex care requirements. While there is an increased financial cost, the most significant cost is the pain and

discomfort experienced by the patient.

**Context** Preventing hospital-acquired infections therefore presents an important

challenge to clinicians and health service managers. Significant reductions in hospital-acquired infection rates are already being achieved in some hospitals

through preventative initiatives.

### Health Outcome 2: Safe care is delivered across all settings

#### **Denominator**

Denominator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation dates in the reporting period, **excluding** service events with any of the following:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.

Denominator source

Denominator availability

**EDW** 

Available

Inclusions

**Exclusions** 

All admitted patient service events in NSW public hospitals

Note: Mental health and drug and alcohol admitted patient service events are included in the current version (ACSQHC HACs V3.1)

Numerator exclusions:

 Admitted patient service events with the qualified diagnosis codes recorded as the principal diagnosis code.

Numerator and denominator exclusions:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

**Targets** 

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12-month rolling period (12 months to date). Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits

### Health Outcome 2: Safe care is delivered across all settings

are flagged as 'Not Performing'. Targets are not applicable if the expected

number of HACs is less than 1.

**Context** Hospital-acquired respiratory complications extend the length of

hospitalisation, which impacts on patients and their families. These complications also increase the cost of admission incurred by the health service. This additional cost may be the result of an increased length of stay or more complex care requirements. While there is an increased financial cost, the most significant cost is the pain and discomfort experienced by the

patient.

- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

#### **Targets**

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12-month rolling period (12 months to date). Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

## Health Outcome 2: Safe care is delivered across all settings

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is less than 1.

Variation may exist in the assignment of ICD-10-AM codes, leading to under-reporting in post-operative or post-procedural period; in particular, the assignment of an additional code (I26.0, I26.9, I80.1 or I80.2) identifying the presence of the VTE as a post-operative or post-procedural complication is not a mandatory coding practice. Therefore, coding practices may require evaluation to ensure consistency.

#### Health Outcome 2: Safe care is delivered across all settings

are flagged as 'Not Performing'. Targets are not applicable if the expected

number of HACs is less than 1.

**Context** "HACs affect patient's recovery, outcome and can result in a longer length of

stay and higher costs to health service system, more work is needed to reduce HACs and improve the quality of care provided to patients.

Hospital-associated acute kidney injury (also known as acute renal failure) is common as it may be caused by impaired renal perfusion due to hypotension or dehydration, medicines, recent surgery, radiographic contrast media, or sepsis. Renal failure may cause distressing symptoms including fluid retention and swelling, dyspnoea, drowsiness, fatigue, cognitive clouding and confusion, persistent nausea, and seizures. The condition also has an extremely high mortality rate of 50%. Early recognition and intervention are important elements of effective treatment."

- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.

Denominator source EDW

Denominator availability Available

#### Inclusions

All admitted patient service events in NSW public hospitals

Note: Mental health and drug and alcohol admitted patient service events are included in the current version (ACSQHC HACs V 3.1).

#### **Exclusions**

Numerator exclusions:

 Admitted patient service events with the qualified diagnosis codes recorded as the principal diagnosis code.

Numerator and denominator exclusions:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM

#### Health Outcome 2: Safe care is delivered across all settings

- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE\_SERVICE\_CATEGORY\_CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

Targets The risk adjusted targets for individual Local Health Districts and Local Specialty

Health Networks are set for a 12 month rolling period (12 months to date).

Finalised performance targets for individual LHDs or Specialty Networks can

be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is

less than 1.

Context Contextual information can be found in the ACSQHC's HAC information kit,

downloadable from the Commission's website:

https://safetyandquality.govcms.gov.au/sites/default/files/2019-

## Health Outcome 2: Safe care is delivered across all settings

Data domain

Date effective 1 July 2019

Related National Indicator This HAC indicator follows the ACSQHC's specification:

Australian Commission on Safety and Quality in Health Care - ACSQHC's

Hospital Acquired Complication (HAC 10) in release V 3.1:

https://www.safetyandquality.gov.au/our-work/indicators/hospital-acquired-

Health Outcome 2: Safe care is delivered across all settings

INDICATOR: KS2136 Previous ID: KS2122

Hospital Acquired Delirium (Rate per 10,000 admitted

patient service events)

Shortened Title Hospital Acquired Delirium
Service Agreement Type Key Performance Indicator

**NSW Health Strategic** 

**Outcome** 

2: Safe care is delivered across all settings

Status Final Version number 1.21

Scope All patients admitted to public hospitals in NSW

**Goal** To reduce hospital acquired delirium by the provision of care that mitigates

avoidable clinical risks to patients.

**Desired outcome** Reduction in hospital acquired delirium

Primary point of collection

Data Collection Source/System

Patient medical record

Admitted patient data collection

Primary data source for

analysis

**EDW** 

**Indicator definition** 

Numerator

Rate of hospital acquired delirium per 10,000 admitted patient service events

Numerator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation dates in the reporting period, and with at least one of the ICD-10-AM codes listed in the Australian Commission on Safety and Quality in Health Care's (ACSQHC) HACs specification file for HACs V 3.1 (April 2022 release) downloadable from <a href="https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31">https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31</a> for the numerator for hospital acquired Delirium (HAC 11). The 12<sup>th</sup> Edition of ICD-10-AM coding should be used, which includes the following additional diagnosis codes:

- Any of ICD 10 AM 12<sup>th</sup> Edition codes: F05.0, F05.1, F05.8, F05.9, and R41.0.
- AND condition onset flag code of 1.
- AND satisfying the criteria for the denominator
- For analysis relating to newborns with qualified days includes separations with any of specified ICD-10-AM codes as either the principal diagnosis or an additional diagnosis.

For one admitted patient service event, one type of HAC is only counted at most once if multiple diagnoses of the HAC are identified.

Denominator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation dates in the reporting period, **excluding** admitted patient service events

with any of the following:

#### Health Outcome 2: Safe care is delivered across all settings

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE SERVICE CATEGORY CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.

Denominator source Denominator

EDW Available

Inclusions

availability

All admitted patient service events in NSW public hospitals

Note: Mental health and drug and alcohol admitted patient service events are included in the current version (ACSQHC V3.1).

**Exclusions** 

Numerator exclusions:

Admitted patient service events with the qualified diagnosis codes recorded as the principal diagnosis code.

Numerator and denominator exclusions:

- Same-day chemotherapy DRG V11: R63Z and SE\_START\_DTTM = SE\_END\_DTTM
- Same-day haemodialysis DRG V11: L61Z and SE\_START\_DTTM = SE\_END\_DTTM
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE SERVICE CATEGORY CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

**Targets** 

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12-month rolling period (12 months to date). Finalised performance targets for individual LHDs or Specialty Networks can

be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is less

than 1.

Context

Hospital-acquired delirium prolongs the length of hospitalisation, increases the cost of admission, and adds pain and discomfort to the patient. Prevention is the most effective strategy, but outcomes for patients with delirium can also be improved by early recognition and intervention. Significant reductions in delirium rates are being achieved in some hospitals through preventive initiatives.

- Hospital boarder (SE SERVICE CATEGORY CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

**Targets** 

The risk adjusted targets for individual Local Health Districts and Local Specialty Health Networks are set for a 12 month rolling period (12 months to date). Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here: 2023-24 HAC Targets

The risk adjusted targets have been developed using risk adjusted models on the 2022 NSW APDC data. The risk adjustors used are largely in the same dimensions as those used for IHPA's service activity adjustors.

Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'. Targets are not applicable if the expected number of HACs is less than 1.

Context

Hospital-acquired persistent incontinence prolongs the length of hospitalisation, increases the cost of admission, and adds pain and discomfort to the patient. The majority of persistent incontinence can also be prevented. Significant reductions in hospital-acquired persistent incontinence rates are being achieved in some hospitals through preventive initiatives.

**Numerator** 

Numerator definition Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation

dates in the reporting period, and with at least one of the ICD-10-AM codes listed in the Australian Commission on Safety and Quality in Health Care's (ACSQHC) HACs

specification file for HACs V 3.1 (April 2022 release) downloadable from <a href="https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31">https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31</a> for the numerator for 3rd or 4th Degree Perineal Lacerations (HAC 15). The 12th Edition of ICD-10-AM coding should be used, which includes the following additional diagnosis

codes:

 any of O70.2 and O70.3 as an additional diagnosis, with any condition onset flag code.

AND all the criteria for the denominator.

For one admitted patient service event, one type of HAC is only counted at most once

if multiple diagnoses of the HAC are identified.

Numerator source EDW

Numerator availability Available from 1 September 2015

**Denominator** 

#### Health Outcome 2: Safe care is delivered across all settings

#### Denominator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') that resulted in vaginal birth with separation dates in the reporting period, with:

- Any of ICD-10-AM 12<sup>th</sup> Edition codes: Z37.0, Z37.1, Z37.2, Z37.3, Z37.4, Z37.5, Z37.6, Z37.7, Z37.9, any onset flag
- AND a Caesarean birth was NOT recorded (No ACHI procedure codes 16520-00, 16520-01, 16520-02, 16520-03, 16520-04, 16520-05.

excluding admitted patient service events with any of the following:

- Admitted patients transferred in from another hospital.
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE SERVICE CATEGORY CD = '0')
- Care type is 'Organ procurement-posthumous' -SE\_SERVICE\_CATEGORY\_CD = '9'.

Denominator source

**EDW** 

Denominator availability

Available

#### Inclusions

All admitted patient service events in NSW public hospitals

Note: Mental health and drug and alcohol admitted patient service events are included in the current version (ACSQHC HAC V 3.1).

#### **Exclusions**

#### **Numerator exclusions:**

- Admitted patient service events where an O70.2 or O70.3 ICD10AM code has been recorded as a principal diagnosis.
- Admitted patient service events with a birth via a Caesarean Section.
- Admitted patient service events where the Admission Mode was 'Transfer of admitted patient from another facility' (SE\_ADM\_MODE\_NHDD\_CD = '1').

#### Numerator and denominator exclusions:

- Admitted patients transferred in from another hospital (SE ADM MODE NHDD CD = '1').
- Service Category is 'Newborn unqualified days only ' (i.e. SE\_SERVICE\_CATEGORY\_CD = '5' and COUNT\_TOTAL\_SE\_QUAL\_DAY\_COUNT =0)
- Hospital boarder (SE SERVICE CATEGORY CD = '0')
- Care type is 'Organ procurement-posthumous' SE\_SERVICE\_CATEGORY\_CD = '9'.
- Any uncoded records.

#### **Targets**

The targets for individual Local Health Districts are set for a 12-month rolling period (12 months to date). **Finalised performance targets for individual LHDs or Specialty Networks can be downloaded from here:** 2023-24 HAC Targets

NSW average rate was used to calculate the expected rates, no risk adjustment was applied. Rates of under and up to 80% upper control limits of expected rates are scored as 'Performing', rates between 80% and 95% upper control limits as 'Under Performing', and rates above the respective 95% upper control limits are flagged as 'Not Performing'.

Neonatal Birth Trauma

Key Performance Indicator

NSW Health Strategic Outcome

2: Safe care is delivered across all settings

Status

Final

Version number

1.21

Scope

All neonatal patients admitted to public hospitals in NSW

Goal

Improve safety outcomes and increase quality outcomes.

**Desired outcome** 

Reduction in the number of patients acquiring neonatal birth trauma.

Primary point of collection

Patient medical record.

**Data Collection Source/System** 

Admitted patient data collection.

Primary data source for analysis

**EDW** 

**Indicator definition** 

The rate of completed newborn admitted patient service events within the reporting period where neonatal birth trauma has occurred in a public hospital per 10,000 admitted patient service events

#### **Numerator**

Numerator definition

Total number of admitted patient service events (SE\_TYPE\_CD = '2') with separation dates in the reporting period, and with at least one of the ICD-10-AM codes listed in the Australian Commission on Safety and Quality in Health Care's (ACSQHC) HACs specification file for HACs V 3.1 (April 2022 release) downloadable from <a href="https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31">https://www.safetyandquality.gov.au/publications-and-resources/resource-library/hospital-acquired-complications-hacs-list-specifications-version-31</a> for the numerator Neonatal Birth Trauma (HAC 16). The 12th Edition of ICD-10-AM coding should be used, which includes the following additional diagnosis codes:

- Any of the listed ICD-10-AM 12<sup>th</sup> Edition codes recorded as an additional diagnosis
- AND with any condition onset flag.
- AND satisfying the criteria for the denominator

For one admitted patient service event, one type of HAC is only counted at most once if multiple diagnoses of the HAC are identified.

## Health Outcome 2: Safe care is delivered across all settings

INDICATOR: SSQ114 Discharged Against Medical Advice for Aboriginal

Previous IDs: SSQ118 Inpatients (%)

The proportion of Aboriginal patients who discharge from hospital against medical

advice, reported by Aboriginal People

Shortened Title Patients Discharged Against Medical Advice

Service Agreement Type Key Performance Indicator

NSW Health Strategic 2: Safe care is delivered across all settings

Outcome

Status Final Version number 2.01

**Scope** Admitted patients, all public hospitals

**Goal** Decrease the proportion of hospitalisations for Aboriginal people that result in

discharge against medical advice. Provide effective and culturally safe inpatient

health services to Aboriginal people.

**Desired outcome** Reduce the risk for Aboriginal people of adverse health outcomes associated with

discharge against medical advice

**Primary point of collection** The primary business collection point of the data

Initial source/point of or person collecting data (eg: Medical record, clerk,

operator).

**Data Collection**Local Health Districts: Patient Medical record, Hospital PAS System **Source/System**NSW Ministry of Health: NSW Admitted Patient Data Collection

Primary data source for EDWARD

analysis

NSW Admitted Patient Data Collection (SAPHaRI)

Indicator definition Proportion of hospitalisations of Aboriginal patients ending in discharge against

medical advice during the reporting period as compared to the proportion of hospitalisations of Non-Aboriginal patients ending in discharge against medical

advice during the same reporting period.

Note that Aboriginal people includes people who identify as Aboriginal and/or

Torres Strait Islander.

**Numerator** 

Numerator definition Number of admitted patient service events (SE TYPE CD = '2') for Aboriginal

people where the mode of separation is recorded as "left against medical advice /

discharge at own risk" during the reporting period.

(See: Meteor, AIHW, "Episode of admitted patient care—separation mode, code

NN". https://meteor.aihw.gov.au/content/722644).

Numerator source Hospital PAS Systems. EDWARD. NSW Admitted Patient Data Collection

(SAPHaRI)

Denominator

## Health Outcome 2: Safe care is delivered across all settings

Denominator definition The total number of admitted patient service events (SE\_TYPE\_CD = '2') for

Aboriginal people during the reporting period.

Denominator source Hospital PAS Systems. EDWARD. NSW Admitted Patient Data Collection

(SAPHaRI)

Denominator availability

Data routinely collected and available

**Inclusions** All patients admitted to public hospital facilities in NSW

**Exclusions** None

**Targets** 

Target To close the gap in rates of discharge against medical advice between Aboriginal and Non-Aboriginal people at the LHD and state level. Decrease on previous year, with the reporting period comparison being against the previous full year's results as at 30 June of that financial year.

 Performing - ≥1% decrease on previous year for prior year results at 2.0% or above

Under performing - 0 to <1% decrease on previous year</li>

Not performing – Increase on previous year

Geographical area of interest: Whole state / LHDs

Comments: Data are not age standardised

**Context** Discharge against medical advice involves patients who have been admitted to

hospital who leave against the expressed advice of their treating physician. Patients who discharge against medical advice have higher readmission rates, higher levels of multiple admissions, and a higher rate of in-hospital mortality. This measure provides indirect evidence of the cultural safety of hospital services, and

the extent of patient satisfaction with the quality of care provided.

Key Performance Indicator

**NSW Health Strategic Outcome** 

2: Safe care is delivered across all settings

Status

Final

Version number

19

Scope

All elective surgery patients who are admitted (or treated as a non-admitted patient) and included in the NSW Ministry of Health Waiting Times Collection.

Goal

To ensure that elective surgical patients receive their surgery within the clinically recommended timeframe in NSW public hospitals.

Desired outcome

Better management of waiting lists to minimise waiting time for elective

surgery.

Primary point of collection

Waiting List/Booking Clerk: Receipt of inbound Recommendation for Admission Form (RFA) to a public hospital for patient registration on waiting

lıst.

**Data Collection Source/System** 

Patient Admission System (PAS)/Waiting List Collection On–Line System (WLCOS)

Primary data source for analysis

Wait List/Scheduling Data Stream (via EDWARD)

Indicator definition

The percentage (%) of elective surgery patients on the NSW Ministry of Health Waiting Times Collection who were admitted (or treated as a non-admitted patient) within the timeframe recommended for their clinical urgency/priority category.

Numerator

Numerator definition

Total number of elective surgery patients in the NSW Ministry of Health Elective Surgery Waiting Times Collection who:

 have been admitted for treatment (or treated as a non-admitted patient) within the reporting period, (measured by removal from the waiting list removal with a status = 1, 2, 7, 8).

#### Health Outcome 2: Safe care is delivered across all settings

 For EDW, the equivalent removal status codes are where FACT\_WL\_BKG\_CENSUS.WL\_REMOVAL\_REASON\_CD = '01', '01.01', '01.02', '01.03', '01.05', '01.06', '01.07', '01.08', '01.09', '07.01' or '07.02'

#### and

 were admitted (or treated as a non-admitted patient) within the timeframe recommended for their clinical urgency/priority category, where waiting time is measured from the last assigned clinical urgency/priority category or any other previous equal to or higher clinical urgency/priority category.

#### Note: Includes:

- Staged patients Refer to Waiting Time and Elective Surgery Policy for management of staged patients
- Emergency admissions for their recorded waitlist procedure

Note on the transition to EDWARD: Whereas WLCOS receives the last 3 clinical urgency/priority category changes for a given booking, EDWARD receives all clinical urgency/priority category changes for a given booking. There are some instances where the WLCOS and EDWARD result will differ due to this limitation, with EDWARD reporting a more accurate value.

Numerator source EDW

Scope All ready-for-care patients currently on the NSW Health Waiting Times

Overdue Elective Surgery Patients

2: Safe care is delivered across all settings

Key Performance Indicator

Collection for elective surgery.

**Goal** To reduce waiting time for elective surgery in public hospitals.

**Desired outcome**Better management of waiting lists to minimise waiting time for elective

surgery.

Primary point of collection Waiting List/Booking Clerk: Receipt of inbound Recommendation for

Admission Form (RFA) to a public hospital patient registration

Public hospital wait list management

**Data Collection Source/System** Patient Admission System (PAS).

Primary data source for analysis Wait List/Scheduling Data Stream (via EDWARD).

Indicator definition Number of elective surgical patients on the NSW Health Elective Surgery

Waiting Times Collection whose waiting time (last urgency/priority waiting time for categories 1 and 2, ready for care days for category 3) has exceeded the time recommended in the clinical urgency/priority category to which they have been assigned, where waiting time is measured from the last assigned clinical urgency/priority category or any other previous equal to or higher clinical

urgency/priority category.

Numerator • Number of Category 1 patients waiting >30 days

Numerator definition Number of Category 1 elective surgical patients who have been waiting for admission greater than 30 days.

• Number of Category 2 patients waiting >90 days

Number of Category 2 elective surgical patients who have been waiting for admission greater than 90 days.

Number of Category 3 patients waiting >365 days

Number of Category 3 elective surgical patients who have been waiting for admission greater than 365 days.

108 | Page

# Health Outcome 2: Safe care is delivered across all settings

Note on the transition to EDWARD: Whereas WLCOS received the last 3 clinical urgency/priority category changes for a given booking, EDWARD receives all clinical urgency/priority category changes for a given booking. As

a result, EDWARD will report a more accurate value.

Numerator source EDW

Numerator availability Available Monthly

**Inclusions** Ready for Care patients (clinical urgency/priority categories 1, 2 and 3) on the

elective surgical waiting list. For EDW,

WL\_BKG\_PRIORITY\_CLIN\_PRIORITY\_CD = '1', '2' and '3'.

• Not Ready for Care (NRFC) patients are excluded. For EDW, the NRFC

status is identified through the presence of a current NRFC\_REC\_ID

record.

**Targets** 

0 (Zero) for category 1 > 30 days per reporting period

0 (Zero) for category 2 > 90 days per reporting period

0 (Zero) for category 3 > 365 days per reporting period

Comments Patients should be admitted within the timeframe recommended for the

assigned clinical urgency/priority category:

Category 1: Procedures that are clinically indicated within 30 days.

Category 2: Procedures that are clinically indicated within 90 days.

Category 3: Procedures that are clinically indicated within 365 days.

**Context** Elective surgery: The numbers of overdue patients represent a measure of the

hospital's performance of elective surgical care.

**INDICATOR: SSQ106, SSQ107** 

Previous IDs: 0001, 9A1

**Unplanned Hospital Readmissions**: all unplanned admissions within 28 days of separation (%):

- All persons (SSQ106)
- Aboriginal persons (SSQ107)

Shortened Title Unplanned Hospital Readmissions

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 2: Safe care is delivered across all settings

Status Final Version number 3.5

**Scope** All patient admissions to public facilities in peer groups A1 – D1b.

Goal To identify and manage the number of unnecessary unplanned readmissions. To

Increase the focus on the safe transfer of care, coordinated care in the community

and early intervention.

**Desired outcome** Improved efficiency, effectiveness, quality and safety of care and treatment, with

reduced unplanned events.

Primary point of collection Administrative and clinical patient data collected at admission and discharge

Data Collection Source/System Admitted Patient Data Collection, Hospital Patient Admission Systems (PAS)

Primary data source for analysis EDW

**Indicator definition**The percentage of admissions that are an unplanned readmission to the same

facility within 28 days following discharge for any purpose, disaggregated by

Aboriginality status.

Note that Aboriginal persons include people who identify as Aboriginal and/or

Torres Strait Islander.

**Numerator** 

Numerator definition The total number of unplanned admissions (counted as Service Encounters, not

Service Events) with admission date within reference period and patient previously discharged from same facility in previous 28 days for any purpose, disaggregated

by Aboriginality status.

Where: Unplanned is defined as Urgency of Admission

(FORMAL\_ADMIT\_URGN\_CD) = '1'.

A readmission is defined as an admission with a FORMAL\_ADMIT\_DTTM within 28 days of the FORMAL\_DISCH\_DTTM of a previous stay for the same patient at

the same facility (identified by OSP CBK and CL ID).

Aboriginality status = CL\_INDGNS\_STUS CD

Numerator source EDW

Numerator availability Available monthly

Inclusions • SE TYPE CD = '2'

• Readmissions that result in death

Exclusions Transfers in from other hospitals (SE\_ADM\_MODE\_NHDD\_CD = '1').

### Health Outcome 2: Safe care is delivered across all settings

Transfers are not counted in the Numerator as these are considered for the purposes of this indicator as patients who are continuing their care in this new location.

- SE\_TYPE\_CD = '2'
- Transfers from other hospitals (SE\_ADM\_MODE\_NHDD\_CD = '1')

Transfers in are included in the denominator as these service encounters can potentially result in a patient readmission to the same hospital following discharge.

**Exclusions** 

Admissions that result in death

Inclusions

- Each index/initial admission can have at most one readmission
- A readmission can be an index/initial admission to another readmission.

**Exclusions** 

- Additional Service Events created through a change in service category);
- Hospital boarders and organ procurement (SE\_SERVICE\_CATEGORY\_CD '0' or '9');
- Health organisations in peer groups (OSP\_PEER\_GRP\_CD) below D1b.

### **Targets**

Reduction from previous year

- Performing: Decrease from previous year
- Under performing: No change from previous year
- Not performing: Increase on previous year.

Comments

- For this indicator, the focus is on the readmission that is, the second admission looking backwards across the reporting period.
- For the Aboriginal person's disaggregation, the presence of an Aboriginal
  person in the numerator and denominator is dependent on the recording of
  the value in both admitted patient service events. For instance, where a
  person has two discharges within the same reporting period, in the situation
  where the 1st episode is flagged as being for an Aboriginal person, but not
  the readmission, then the 1st admitted patient service event will be in the
  denominator, but the readmission will not be in the numerator or
  denominator.
- Patient deaths are excluded from the denominator but not the numerator. If
  the patient dies during an admission they are unable to readmit and
  therefore are excluded from the denominator. However, if the patient dies
  during a readmission, the readmission is included in the numerator
  (regardless of the outcome of the readmission). However, the index

# Health Outcome 2: Safe care is delivered across all settings

admission prior to the readmission is counted in the denominator provided that the admission date of the index admission falls within the reference period.

- Further, there can be a readmission with no denominator. This is the case if a patient dies during their readmission and the index admission prior to the readmission occurs before the start of the reference period. In this case the readmission is counted in the numerator but not the denominator.
- While administrative data can be used to identify unplanned readmissions it cannot clearly identify that the unplanned readmission was either related to the previous admissions or unexpected or preventable.
- This definition does not correspond with the ACHS Clinical Indicators which depends upon clinical decision on review;
- Transfers from another hospital are not counted as readmissions as they
  can reasonably be seen as a continuation of a patients care in this new
  location and therefore excluded from the numerator. However these
  patients who transfer into a facility are still included in the denominator as at
  discharge the potential exists for these patients to represent for care after
  their care had previously been considered to be complete.

#### Context

A low readmission rate may indicate good patient management practices and postdischarge care; facilities with a high readmission rate may indicate a problem with a clinical care pathway, including connection with care in the community.

Mental Health Acute Post-Discharge Community

Care - Follow up within seven days (%)

**Previous IDs:** 

All persons (KQS204)

Aboriginal persons (KQS204a)

Shortened Title Mental Health: Acute Post Discharge Community Care

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 2: Safe care is delivered across all settings

Status Final Version number 3.0

Scope Mental health services

**Goal** Improve the effectiveness of a District's inpatient discharge planning and

integration of inpatient and community mental health services.

**Desired outcome** Increase patient safety in the immediate post-discharge period and

reduce the need for early readmission.

**Primary point of collection** Administrative and clinical staff at designated acute mental health

facilities with mental health unit/beds, psychiatric hospitals, and

community mental health facilities.

Data Collection Source/System Inpatient data: Patient Administration Systems. Community data: SCI-

MHOAT, CHIME, CERNER, iPM.

Primary data source for analysis Admitted Patient Data Collection - EDW LRS;

Community Mental Health Data Collection (CHAMB) - EDW LRS.

Enterprise Unique Person Identifier (EUID) - EDW LRS.

Indicator definition Percentage of overnight separations from NSW acute mental health

inpatient units which were followed by a public sector Community Mental Health contact, in which the consumer participated, within the seven days immediately following that separation, disaggregated by Aboriginality

status.

Note that Aboriginal persons include people who identify as Aboriginal

and/or Torres Strait Islander.

**Numerator** 

Numerator definition Overnight separations from NSW acute mental health inpatient units

occurring within the reference period which were followed by a recorded public sector community mental health contact, in which the consumer participated, within the seven days immediately following that separation,

disaggregated by Aboriginality status.

Aboriginality status = CL\_INDGNS\_STUS\_CD

Numerator source Admitted Patient and CHAMB data in EDW LRS, linked via the NSW

Health Enterprise Unique Person Identifier (EUID).

Numerator availability Admitted Patient data available.

CHAMB data available.

# Health Outcome 2: Safe care is delivered across all settings

#### **Denominator**

Denominator definition

Number of overnight separations from a NSW acute psychiatric inpatient unit(s) occurring within the reference period, disaggregated by Aboriginality status.

**Note:** Separations are selected from NSW AP Service Event tables, where SE\_TYP\_CD = '2', Ward Identifier = designated MH units and Unit Type=MH bed types, from Mental Health Service Entity Register (MH-SER) ward tables.

Denominator source

Admitted Patient Data Collection in EDW LRS.

Denominator availability

Available.

#### **Inclusions**

Includes only overnight separations where the last ward is a designated acute mental health unit.

Uses only separations with EUID to link the separation of inpatients from acute mental health units with contacts recorded in the community. Includes all financial subprograms (Child & Adolescent, Adult General, Forensic, and Older Persons).

Mental health ambulatory service contacts delivered to any registered client who participated in the contact.

#### **Exclusions**

#### Excludes:

- same-day separations,
- separations where the length of stay is one night only and a procedure code for Electroconvulsive Therapy (ECT) or Trans-cranial Magnetic Stimulation (TMS) is recorded and
- separations where the mode of separation is:
  - death;
  - transfer to another acute or psychiatric inpatient hospital;
  - service category change.

Note: Post-discharge contacts do not include:

- Inpatient events in a mental health inpatient unit by inpatient staff
- Community contacts on the day of separation.
- Community residential events in a community residential facility by community residential staff
- Non client-related events
- Travel time contacts by non mental health program or NGO/CMO service providers.

#### **Targets**

On average expect 75% of overnight separations from NSW acute mental health units to be followed by a recorded community contact within 7 days of discharge.

- Performing: ≥ 75%
- Under Performing: ≥ 60% and < 75%
- Not Performing: <60%</li>

### Health Outcome 2: Safe care is delivered across all settings

#### Comment

Community follow-up can be detected only if a community contact has been recorded in the Area clinical information system. Low community contact recording will result in an apparently low follow-up rate.

A person needs to be accurately identified in both inpatient and ambulatory data collections to enable the SUPI process to link their records. Errors or omissions in the data, making this linkage less efficient, will result in an apparently low follow-up rate. Some separations are appropriately followed up by GP, private psychiatrist or contracted NGO and will not be captured within this indicator.

An electronic copy of Desktop Audit: Acute 7 Days Post Discharge Community Care is available from, InforMH, System Information and Analytics Branch, Ministry of Health.

#### Context

The majority of people with chronic and recurring mental illness are cared for in the community. Continuity of care (follow up and support by professionals and peers) in the community settings for psychiatric patients discharged from a hospital leads to an improvement in symptoms severity, readmission rate, level of functioning and patient assessed quality of life. Early and consistent follow up in the community reduces suicide among hospital discharged mental health patients with high suicide risk and history of self-harm.

Source: Key Performance Indicators for Australian Public Mental Health Services, third edition 2013. Australian Govt, Canberra.

#### **Related Policies/ Programs**

The NSW Health Policy Directive "Discharge Planning and Transfer of Care for Consumers of NSW Health Mental Health Services" (PD2019\_045), articulates the roles and responsibilities for safe, efficient and effective transfer of care between inpatient settings and from hospital to the community. The policy aims to address two key state targets to improve mental health outcomes:

- Reduce re–admissions within 28 days to any facility
- Increase the rate of community follow–up within 7 days from a NSW public mental health unit

#### Useable data available from

### Health Outcome 2: Safe care is delivered across all settings

INDICATOR: KQS203; KQS203a

Previous IDs: 0008, 9A9

Mental Health: Acute Readmission - within 28 days (%)

All persons (KQS203)

Aboriginal persons (KQ\$203a)

**Shortened Title** Mental Health: Acute Readmissions

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 2: Safe care delivered across all settings

Status Final Version number 4.0

Scope Mental health services

Goal To reduce the number of acute public sector mental health readmissions

to same or another public sector acute mental health unit within 28 days

of discharge.

Desired outcome Improved mental health and well-being through effective inpatient care

and adequate and proper post-discharge follow up in the community.

Primary point of collection Administrative and clinical staff at designated facilities (including stand-

alone psychiatric hospitals) with mental health units/beds.

**Data Collection Source/System** Inpatient data: Patient Administration Systems.

Primary data source for analysis Admitted Patient Data Collection - EDW LRS; NSW Health Enterprise

Unique Person Identifier (EUID) –EDW LRS.

Indicator definition Percentage of overnight separations from a NSW acute Mental Health

unit followed by an overnight readmission to any NSW acute Mental Health unit within 28 days, disaggregated by Aboriginality status.

Note that Aboriginal persons include people who identify as Aboriginal

and/or Torres Strait Islander.

**Numerator** 

Numerator definition Overnight separations from a NSW mental health acute psychiatric

inpatient unit(s) occurring within the reference period, that are followed by an overnight readmission to the same or another acute psychiatric inpatient unit within 28 days, disaggregated by Aboriginality status, where

 $SE_TYP_CD = '2'$ .

Aboriginality status = CL\_INDGNS\_STUS\_CD.

Numerator source Admitted Patient Data Collection (EDW LRS).

Readmission between facilities detected by

(i) EUID where available or

(ii) CL\_ID\_CBK (CLIENT\_ID\_CBK) where EUID not available.

Numerator availability Availability of Admitted Patient data is good; however, time must be

allowed for readmissions to occur and be recorded in systems.

### Health Outcome 2: Safe care is delivered across all settings

Numerator is therefore only available after a lag of 2 months, e.g. a June report will measure readmissions following separations in April.

#### Denominator

Denominator definition

Number of overnight separations from a NSW acute psychiatric inpatient unit(s) occurring within the reference period, disaggregated by Aboriginality status.

Note: Separations are selected from NSW Admitted Patient Service Event tables, where ward identifier = designated MH units and unit type=MH bed types, from Mental Health Service Entity Register (MH-SER) ward table.

Denominator source

Admitted Patient Data Collection in EDW LRS.

Denominator availability

Available.

#### Inclusions

**Numerator:** Overnight separations, where the last ward is a designated acute mental health unit, which are followed by an overnight admission to any designated acute mental health unit within 28 days.

**Note:** Each admission can only have one readmission within 28 days for the reporting period. Any subsequent readmission within the reporting period is only counted as a readmission against the admission immediately preceding it.

**Denominator:** Separations following overnight acute care where the last ward is a designated acute mental health unit.

### **Exclusions**

**Numerator:** Separations where the length of stay is one night only and a procedure code for Electroconvulsive Therapy (ECT) is recorded.

#### **Denominator:**

- Separations where "mode of separation" = death, transfer or service category change change.
- Same day separations. This exclusion applies to each separation in the denominator and any subsequent readmission.
- Separations where the length of stay is one night only and a
  procedure code for Electroconvulsive Therapy (ECT) or Transcranial Magnetic Stimulation (TMS) is recorded. This exclusion
  applies to each separation in the denominator and any
  subsequent readmission.

### **Target**

Less than or equal to 13% (10% for readmission to same facility and 3% for readmission to another facility/Area).

- Performing: ≤ 13%
- Under Performing: > 13% and ≤20%
- Not Performing: > 20%

An electronic copy of Desktop Audit: Acute 28 Day Readmission is available from, InforMH, System Information and Analytics Branch, Ministry of Health.

#### Context

Readmission to hospital within 28 days of discharge has become one of the most widely used Key Performance Indicators in Australian health care.

# Health Outcome 2: Safe care is delivered across all settings

Within mental health care, 28 Day Readmission is reported in all Australian jurisdictions. The Australian national mental health KPI set includes the indicator in the domains of effectiveness and continuity, stating "high levels of readmissions within a short timeframe are widely regarded as reflecting deficiencies in inpatient treatment and/or follow-up care and point to inadequacies in the functioning of the overall system". Source: Key Performance Indicators for Australian Public Mental Health Services, third edition 2013. Australian Govt, Canberra.

#### **Related Policies/ Programs**

The NSW Health Policy Directive *Discharge Planning and Transfer of Care for Consumers of NSW Health Mental Health Services"* (*PD2019\_045*), articulates the roles and responsibilities for safe, efficient and effective transfer of care between inpatient settings and from hospital to the community. The policy aims to address two key state targets to improve mental health outcomes:

- Reduce re-admissions within 28 days to any facility
- Increase the rate of community follow–up within 7 days from a NSW public mental health unit.

Inclusions

#### **Numerator:**

EDW SERVICE\_CONTACT\_MODE\_CODE "2", "C", "P" or 'T'. The code labels can be viewed here:

http://hird.health.nsw.gov.au/hird/view\_domain\_values\_list.cfm?ItemID=9437

#### **Numerator & Denominator:**

CLINICAL\_OR\_THERAPEUTIC\_SERVICE\_FLAG = 'Y'

#### **Exclusions**

#### **Numerator & Denominator:**

NAP occasions of service provided by service units with the following Establishment Types:

- 11.04 Needle Exchange Allied Health/ Nursing Unit
- 11.05 Supervised Administration of Opioid Treatment Program
   Medication
- 13.01 Pathology (Microbiology, Haematology, Biochemistry) Unit
- 13.02 Pharmacy Dispensing Unit
- 13.04 Sonography / Ultrasonography Diagnostic Unit
- 13.12 Interventional Imaging Procedure Unit
- 14.10 Information Management Service Unit
- 18.01 Emergency Department Level 1
- 18.02 Emergency Department Level 2
- 18.03 Emergency Department Level 3
- 18.04 Emergency Department Level 4
- 18.05 Emergency Department Level 5
- 18.06 Emergency Department Level 6
   27.02 Cataract Extraction Procedure Unit
- 28.01 Oral Health / Dental, nfd Procedure Unit
- 35.01 Residential Aged Care Unit, nfd
- 39.21 Health Transport Unit (Patient)
- 40.01 Home Modification/Maintenance Service Unit
- 41.02 Meals Home Delivered Service Unit

#### **Targets**

#### Target: 30%

An increase of 5 percentage points year-on-year from the Local Health District activity baseline until 30% of non-admitted patient service events are performed virtually.

#### The KPI is calculated as follows:

The percentage of year-to-date non-admitted patient occasions of service with service contact codes 2, C, P, T, compared to the average percentage for the same YTD period across financial years 2019-20, 2020-21, 2021-22, for example YTD at September 2023 will be compared against the average

# Health Outcome 2: Safe care is delivered across all settings

occasions of service for the equivalent YTD periods for FY19/20, FY20/21 and FY21/22.

So, if the % of virtual care OOS for the reporting period was 6%, this would be compared against the average % of equivalent OOS combined for FYs 19/20, 20/21 and 22/22 for the same period. This baseline would be calculated by adding all three years' YTD worth of virtual care OOS (N) and dividing by the total number of in scope OOS for the same YTD period (T): (N+N+N) divided by (T+T+T).

- Performing ≥5 percentage points increase on baseline
- Under performing >0 and < 5 percentage points increase on baseline
- Not performing No change or decrease on baseline

#### Context

Embedding virtual care in NSW health services is a key priority for NSW Health. The NSW Virtual Care Strategy 2021-2026 supports a coordinated and consistent approach to comprehensively integrate virtual care as a complement to face to face care across NSW health services.

Context

Renal Supportive Care (RSC) is a Leading Better Value Care (LBVC) clinical initiative.

#### Model of care

RSC is a state-wide outpatient hospital avoidance program that integrates renal medicine and palliative care to support patients with chronic kidney disease (CKD), particularly those with End Stage Kidney Disease to live as well as possible. ESKD is the final stage of CKD, where kidney function has declined to the point that kidneys can no longer function on their own.

The number of known ESKD patients in NSW in 2019-20 was 9,478, of these 15.4% (or 1,048) were managed under RSC.

### Health Outcome 2: Safe care is delivered across all settings

The RSC service model provides multidisciplinary care that integrates renal medicine and palliative care with a focus on quality of life. It is primarily a nurse-led, networked model aimed at patients who are:

- deciding whether or not to pursue Renal Replacement Therapy (RRT) which includes dialysis and kidney transplant
- conservatively managed patients not pursuing RRT
- receiving RRT but experiencing symptoms and/or psychosocial suffering that significantly reduces their quality of life, or
- withdrawing from dialysis.

RSC presents an opportunity to alter the way ESKD is managed and in doing so improve the experience of receiving and providing care, enhance outcomes and optimise resource use.

RSC delivers financial benefits for the health system by avoiding or delaying dialysis when it may not be appropriate for ESKD management.

#### Enrolment target - minimum 20%

An information package detailing the above enrolment targets was provided to LHD/Network CEs and LBVC program leads in April 2022.

The information package included the findings of the economic appraisal of the Renal Supportive Care program. Guided by a Clinical Advisory Group comprised of clinical experts from several LHDs and the ACI the analysis focused specifically on patients with End Stage Kidney Disease (ESKD) and assessed the economic impact of:

- the RSC program roll-out to date
- further program roll-out to balance patient and health system benefits, and
- selected exploratory scenarios

The analysis showed that RSC has delivered substantial patient and health system benefits to date, however, there is significant variation in program roll-out across NSW with opportunities to further leverage RSC to improve patient outcomes.

To address this variation the Value Based Healthcare Steering Committee agreed on the inclusion of a minimum 20 per cent RSC enrolment target for the ESKD cohort beginning on an incremental basis in the 2022-23 Service Level Agreements (SLAs). Achievement of this minimum enrolment target will balance both the patient and net economic benefits.

#### **Related Policies/Programs**

LBVC is a Value Based Healthcare state-wide priority program.

In NSW, value based healthcare means continually striving to deliver care that improves:

- health outcomes that matter to patients
- experiences of receiving care
- experiences of providing care
- effectiveness and efficiency of care.

Denominator availability

Available

#### **Inclusions**

#### **Numerator & Denominator:**

- (i) Organisations with an emergency department of any role delineation
- (ii) ED accessible bed types:
  - General mixed beds (Bed type = '01')
  - Coronary Care beds (Bed type = '33')
  - Medical beds (Bed type = '46')
  - Surgical beds (Bed type = '47')
  - Medical oncology beds (Bed type = '48')
  - Stroke beds (Bed type = '69')
  - Medical Assessment Units (MAUs) (Bed type = '87')
  - Close Observation Units (Bed type = '93')
- (iii) Rehabilitation bed type:
  - Rehabilitation (Bed type = '02')

#### **Exclusions**

#### **Numerator & Denominator:**

- Discharges from Sydney Childrens Hospital Network.
- Discharges from any other bed type.
- Organisations that do not possess an emergency department.
- Day only separations (patients whose formal admission date and time and formal discharge date and time occur on the same calendar day).
- Patients with a Formal Discharge Mode Code of:
  - o '2' or '02' Discharge Own Risk
  - o '6' or '06' Death with Autopsy
  - '7' or '07' Death without Autopsy
  - '10' Discharge on Leave

### **Targets**

### Target: ≥35%

- Performing: ≥35%
- Under Performing: ≥30% and <35%
- Not Performing: <30%

### Health Outcome 2: Safe care is delivered across all settings

**Context** This target is a measure of timeliness of discharge performance, following on from a

clinical decision that a patient is ready for discharge. It supports the timely admission to a hospital bed, for those emergency department patients who require inpatient treatment, as it contributes to patient comfort and improves outcomes and

the availability of Emergency Department services for other patients.

**Inclusions** 

Aboriginal or Non-Aboriginal women giving birth in NSW, including liveborn babies regardless of gestational age or birth weight and stillborn babies of at least twenty (20) weeks gestation or four hundred (400) grams birth weight. NSW residents only

**Exclusions** 

Aboriginal or Non-Aboriginal women giving birth outside NSW, who

normally reside in NSW

**Targets** 

Aboriginal women: ≥2% decrease on previous year Non-Aboriginal women: ≥0.5% decrease on previous year

	Aboriginal women	Non-Aboriginal women
Performing	≥2% decrease on previous year	≥0.5% decrease on previous year
Underperforming	0 - <2% decrease on previous year	0 - <0.5% decrease on previous year
Not performing	Increase on previous year	Increase on previous year

Long term objective: Reduce the rate of smoking by Non-Aboriginal pregnant women by 0.5% per year and by 2% per year for pregnant Aboriginal women from a 2010 baseline.

Context

Smoking during pregnancy is associated with poor health outcomes for the foetus such as increased risk of perinatal mortality, low birth weight, and other health related issues. The indicator is a key indicator to measure progress towards the national commitment to halve the gap in child mortality between Aboriginal and Non-Aboriginal people.

**Service Agreement Type** 

**NSW Health Strategic** 

**Outcome** 

3: People are healthy and well

Key Performance Indicator

Status Final Version number 1.2

**Scope** Pregnant women aged 16 years and over and referrals from maternity professionals

across NSW.

**Goal** Get the best start in life from conception to age five.

**Desired outcome** Improve the health outcomes of both women and babies by supporting pregnant

women across NSW to achieve a healthy gestational weight gain during their

pregnancy.

**Primary point of collection** Service provider of the Get Healthy Service.

Data Collection Source/System

Customer Relationship Management (CRM) system (Service Provider)

Primary data source for

analysis

Monthly referral data entered into the CRM system and transferred by Secure File

Transfer to Centre for Population Health for independent analysis.

Indicator definition Number of Get Healthy in Pregnancy referrals into the Get Healthy Information and

Coaching Service. Get Healthy in Pregnancy referral is identified as: being pregnant or/and referred by midwife or maternity service or/and enrolling into the Get Healthy

in Pregnancy coaching program.

**Numerator** 

Numerator definition Total number of Get Healthy in Pregnancy referrals in the 2023-24 reporting period.

Numerator source CRM

Numerator availability Monthly

Denominator

Denominator definition Target number of Get Healthy in Pregnancy referrals in the 2023-24 reporting period

Denominator source N/A

Denominator availability N/A

**Inclusions** NSW Adults aged 16 years and over, a Get Healthy in Pregnancy referral is

identified as: being pregnant or/and referred by midwife or maternity service.

**Exclusions** Children and young people aged less than 16 years of age

**Targets** The targets are based on approximately 19% of the 2020 single birth rates for public

hospitals and previous year's performance.

#### Health Outcome 3: People are healthy and well

Version number

1.3

Scope

Patients admitted under a non-AOD specialist treating team that requests treatment advice from hospital drug and alcohol consultation liaison (HDA-CL) clinicians on management of the patient, resulting in a dated entry of clinical significance in the admitted patient/emergency

department medical record.

Key Performance Indicator

Goal

To recognise the volume and value of HDA-CL activity, improve management of AOD-related presentations in hospitals and increase

access to AOD specialist treatment services.

**Desired outcome** 

To enhance the safety, quality, appropriateness, efficiency of services and outcomes for patients with substance use disorders in hospital

settings.

Primary point of collection

**HDA-CL** clinicians

**Data Collection Source/System** 

LHD HDA-CL data collection eMR

Primary data source for analysis

LHD data base and /or NSW AODTS MDS for inpatient consultation

Indicator definition

Percentage increase from the baseline activity of number of HDA-CL consultations provided to non-AOD treating teams concerning patients

admitted to a public hospital within the reporting period.

Numerator

Numerator definition

Numerator source

The total YTD number of HDA-CL consultations provided to non-AOD treating teams concerning patients admitted to a public hospital.

LHD HDA-CL data collection database, eMR

Numerator availability Quarterly

**Denominator** 

The total baseline proportional YTD number of HDA-CL consultations Denominator definition

provided to non-AOD treating teams concerning patients admitted to a

public hospital.

Denominator source The static reported consultations as per SIA HSP Report

Denominator availability Quarterly

**Inclusions** All instances of alcohol and other drug (AOD) treatment advice provided

> by hospital drug and alcohol consultation liaison (HDA-CL) clinicians to non-AOD specialist treating teams on management of a patient, at the

#### Health Outcome 3: People are healthy and well

request of the treating team resulting in a dated entry of clinical significance in the admitted patient/emergency department medical record.<sup>1</sup>

#### **Exclusions**

HDA-CL activity does not include the following:

- patients admitted under the care of an AOD clinical specialist treating team for specialist AOD treatment
- treatment to patients in a non-admitted patient services in Outpatient Hospital Clinics, Community and Ambulatory care services

#### **Targets**

Per cent increase or maintain LHD individual targets, consultation activity in 2023-24 from 2022-23.

- Performing Maintain or increase from 2022-23 baseline.
- Under- performing <10% decrease from 2022-23 baseline.
- Not performing ≥10% decreased from 2022-23 baseline.

#### Context

Effectively recorded/reported specialist HDA-CL activity improves the completeness of clinical documentation for clinical coding, casemix and activity based funding. HDA-CL services improve management of AOD presentations in hospitals and increase access to specialist AOD treatment. This provides evidence to recognise the contribution and support the expansion of HDA-CL services through growth funding.

**Targets** 

Annual targets by LHD are shown in the table below:

LHD <sup>2</sup>	2023/2024 Target for <u>Aboriginal</u> children
CCLHD	25
FWLHD	5
HNELHD	69
ISLHD	37
MLHD	11
MNCLHD	43
NBMLHD	24
NNSWLHD	10
NSLHD	4
SCHN	24
SESLHD	5
SNSWLHD	12
SWSLHD	16
SLHD	6
WNSWLHD	67
WSLHD	2
NSW	368

Note: These targets are based on 2018-19 otitis media surgical procedures to mitigate the impact of COVID-19 on proposed targets.

- Performing: Equal to or greater than specified target
- Under performing: N/A
- Not performing: Less than target

Progress will be reported quarterly against an annual target. Current number of procedures for the non-Aboriginal paediatric population to be maintained.

Context

Aboriginal children have a higher rate of chronic otitis media than Non-Aboriginal children. Chronic otitis media leads to hearing loss and

<sup>&</sup>lt;sup>2</sup> St Vincent's Health Network and Justice and Forensic Mental Health do not have targets as they did not undertake otitis media surgical procedures in 2019/2020.

#### Health Outcome 3: People are healthy and well

developmental delay. Current evidence indicates that the burden of chronic otitis media in Aboriginal children is at least double that of Non-Aboriginal children. As early intervention is required to minimise adverse

consequences of hearing loss.

Geographical area interest Whole State/Local Health District

#### Health Outcome 3: People are healthy and well

#### Comments

Note that an outcomes framework for the whole of government Brighter Beginnings: the first 2000 days of life initiative is being developed. The likely indicator is an increase in the proportion of children starting school developmentally on track by 2027.

#### Context

A key goal of the First 2000 Days Implementation Strategy 2020-25 for the First 2000 Days Framework PD2019 008 is attendance at the recommended schedule of health checks to support optimal childhood health and development so that children enter school developmentally on track. Success depends on engaging families into services as early as possible through the 1-4 week child health check, and continuing engagement throughout the full schedule of health and development checks with the next Indicator point to measured at the 6-8 week check. Attendance at the full schedule of checks will assist families to engage effectively in their children's health and wellbeing, and support parents to develop greater confidence in making evidence-based decisions for building brains. Early engagement with families and attendance at the schedule of health checks will ensure that developmental vulnerabilities are identified and addressed early, before children start school (the First 2000 Days Implementation Strategy 2020-25 program logic). This KPI will indicate:

- Whether families have effectively transitioned from antenatal and postnatal care into child and family health care.
- effective engagement into services to support children's development and delivery of well child health care.

Additional indicators may be added over time to monitor the effectiveness of ongoing engagement in the full schedule of health checks.

**Data Collection Source/System** Local eMRs systems.

**Primary data source for analysis** Report generated using above electronic information systems. Routine

compliance reports will be generated by e-Health NSW in collaboration with each Local Health District/Specialty Health Network and submitted to the Centre for Population Health (CPH), NSW Ministry of Health no later than two weeks following the end of each quarter and in compliance with the NSW Health - Nutrition Care Policy. LHDs/SHNs without electronic information systems will be exempted from reporting, until such time as the

necessary systems to support electronic reporting are in place.

**Indicator definition** Percentage of unique children with an overnight admission/stay, aged

greater than 2 days and up to but not including the 16<sup>th</sup> birthday who have their height/length and weight measured, and entered into the inpatient, health electronic records management system appropriate to that LHD/SHN, on or within the dates of the hospital admission/stay, within the

current reporting period.

**Numerator** 

Numerator definition 
Number of unique children with an overnight admission/stay, aged greater

than 2 days and up to but not including the 16<sup>th</sup> birthday who are admitted to any NSW Health facility (excluding Emergency Department presentations that were not admitted) and had height/length and weight measured and entered at least once into the electronic medical record system, on or within the dates of the hospital admission/stay within the current reporting period.

#### Health Outcome 3: People are healthy and well

that were not admitted) within the current reporting period.

Denominator source Local eMRs systems

Denominator availability Quarterly

**Inclusions**All children with an overnight admission/stay, aged greater than 2 days and up to but not including the 16<sup>th</sup> birthday who have contact with NSW Health.

Anyone below the aged of 2 days and above 16 years of age.

 Any child below the aged of 2 days and up to but not including the 16th birthday who presented to an Emergency Department and was not admitted.

Where measuring weight and height/length may not be appropriate, or else does not enhance patient care, such as

trauma, life-threatening illness and end of life care.

 Services identified as COVID-19 related (as identified by the LHD/SHN to CPH)

70% of unique children who had a relevant encounter with the NSW Health service, with at least one complying height/length and weight measurement conducted on or within the dates of the hospital admission/stay within the current reporting period.

Performing ≥70%

Underperforming ≥65% and <70%</li>

Not performing < 65%</li>

Context Local Health Districts/Specialty Health Networks are responsible for

ensuring all children aged greater than 2 days and up to but not including the 16th birthday have height/length and weight measured and entered into the records management system in compliance with the *NSW Health Nutrition Care Policy*. Compliance with the Policy means that important information about the growth and health of children is captured. This policy contributes to the NSW Strategic Priority that People are healthy and well. To support NSW Health staff within each Local Health District/Specialty

Health Network to monitor and achieve compliance with the Policy.

**Outcome** 

3: People are healthy and well

Status Final Version number 2.0

Scope All women attending Maternity services, Child and Family services, and women

aged 16 years and over in Drug and Alcohol and Mental Health Services.

**Goal** Ensure domestic violence routine screening is conducted on eligible women.

**Desired outcome** Identify and respond to women experiencing domestic violence.

**Primary point of collection** Clinicians in Maternity, Child and Family Health, Drug and Alcohol, and Mental

Health services

Data Collection Source/System

eMaternity, Cerner/eMR, CHIME

Primary data source for

analysis

Domestic Violence Routine Screening Summary Report

Indicator definition The percentage of Domestic Violence Routine Screens completed for women

attending Maternity services, Child and Family Health services, and women aged 16 years and over in Drug and Alcohol and Mental Health Services as a percentage of

eligible women.

**Numerator** 

Numerator definition Number of women attending Maternity services, Child and Family Health services,

and women aged 16 years and over in Drug and Alcohol and Mental Health

Services who have a Domestic Violence Routine Screen completed.

Numerator source eMaternity, Cerner/eMR, CHIME

Numerator availability Quarterly

Denominator

Denominator definition Number of eligible women presenting to Maternity services, Child and Family Health

services, and eligible women aged 16 years and over attending Drug and Alcohol

and Mental Health services

Denominator source eMaternity, Cerner/eMR, CHIME

Denominator availability Quarterly

#### Health Outcome 3: People are healthy and well

#### **Inclusions**

- All women attending Maternity services, Child and Family Health services, and women aged 16 years and over in Drug and Alcohol and Mental Health services.
- Screening completed within reporting period + 12 week offset period after the reporting period.
- For summary reports from eMaternity: If the same woman is screened
  multiple times across different bookings within the same reporting period,
  or across different reporting periods, each screen will be counted in the
  numerator, and each attendance will be counted in the denominator.
- For summary reports from Cerner/eMR: Each encounter is only counted in the summary report totals once.
  - o If there are multiple screens attempted during the same encounter for the same service stream, the completed screen will be prioritised, or otherwise the latest screen attempted. If Inpatient Encounters for Drug and Alcohol and Mental Health specialties are to be included, then 'All streams' needs to be selected.
  - When Inpatient and Community Encounters are combined for the derived specialty of Mental Health or Drug and Alcohol, this will produce a summary count of unique encounters per derived specialty

#### **Exclusions**

- Children of women attending Maternity services, Child and Family Health services, Drug and Alcohol and Mental Health Services.
- For summary reports from Cerner/eMR: Women who did not have a new registration in Child and Family Health, Drug and Alcohol and Mental Health services within the reporting period.

#### **Targets**

70%

- Performing: ≥ 70%
- Under Performing: ≥ 60% and < 70%
- Not Performing: < 60%</li>

#### Context

NSW Health is committed to supporting the early identification and response to domestic violence. Since 2004, NSW Health has been undertaking Domestic Violence Routine Screening (DVRS) for women accessing maternity, child and family services and women, 16 years and over, accessing mental health and alcohol and other drug services. DVRS provides a critical opportunity for the disclosure of domestic violence, early identification and intervention, including initial risk assessment and providing women with information, support and referrals.

A 100% target is not feasible for the Domestic Violence Routine Screening program as this would likely detract from the quality of screening and ensuing outcomes. Nor would it take into account situations where it would be reasonable not to screen including:

- Where the client is not well enough to be screened (i.e. client may be presenting to a Mental Health service for first time and is psychotic)
- Where it is not safe to screen client (i.e. partner may be present)

Denominator availability Monthly

**Inclusions** Families enrolled in the program (who have been referred and assessed

against program criteria)

**Exclusions** Families not eligible according to criteria, or eligible but declining an offer

of a place.

**Targets KF-0061**: At least 50% of families with a child born in 2021/22 who

enrolled in the program, completed the program (ie remained in the program until the child turned two years of age in FY 2023/24).

• Performing: ≥50%

• Under Performing: ≥45% and <50%

Not Performing: <45%</li>

NOTE: Indicator KF-0061 applies to: CCLHD, HNELHD, ISLD, NNSWLHD, SESLHD, SWSLHD (Site 1 and Site 2), SLHD, WSLHD.

**KF-0062:** At least 65% of families with a child born in 2021/22 who enrolled in the program, remained in the program until the child turned one year of age in FY 2023/24 and continued in the program.

Performing: ≥65%

Under Performing: ≥55% and <65%</li>

Not Performing: <55%</li>

**Context** Program dosage is linked to child and parent outcomes. This indicator is

a function of enrolments into the program, and retention for the duration of the program. The benchmark of greater than 50 per cent retention at child's age of two years is in line with literature on sustained nurse home

visiting programs.

Sustaining NSW Families provides intensive structured health home visiting to vulnerable families to support parent-child relationships and

optimise child health, development and wellbeing.

#### Health Outcome 4: Our staff are engaged and well supported

#### 10 business days

- Performing: =< 10 days</p>
- Under Performing: No change from previous year and >10 days
- Not Performing: >10 days

Comments

Achievement of appropriate recruitment times ensures that vacancies are not left unfilled, adversely affecting service provision and workplace culture.

Context

- Policy Directive 2015\_026 "Recruitment and Selection of Staff to the NSW Health Service" sets out a timeline for standard approvals to recruitment of 10 business days. 10 days has therefore become a "de facto" target.
- The target was reviewed by the NSW Health e-Recruitment Governance and Reference Group, which advised on a realistic recruitment timeline which excludes time periods that are not within the employer's control (applicants' decision to accept offer, start date). This definition reflects those recommendations

Goals

Aboriginal Workforce Participation: Aboriginal Workforce as a proportion of total workforce at all salary levels (bands) and occupations: (%)

Shortened Title Aboriginal Workforce Participation

Service Agreement Type Key Performance Indicator

NSW Health Strategic Outcome 4: Our staff are engaged and well supported

Status Final Version number 2.22

Scope Staff employed within NSW Health Workforce

1 ,

 Identify opportunities to recruit Aboriginal people across the breadth and depth of the health service through the strategic use of Identified and Targeted recruitment practices

 Develop strategies for capacity building to support career opportunities for Aboriginal people across the breadth and depth of the health service

Increase the retention of Aboriginal people in the health service through:

 Maximising the number of NSW Health staff who have completed both components of the Respecting the Difference training

 Ensure that the Aboriginal workforce has access to ongoing professional development opportunities through education and training and that clear career pathways are established for Aboriginal staff.

 Providing traineeships, cadetships and scholarships for Aboriginal people to work within health services

 Increasing the response rates to EEO questions across the health service.

**Desired outcome** Increase the number of skilled, competent and qualified Aboriginal staff in

the NSW Health workforce and create a working environment that respects

Aboriginal heritage and cultural values.

Primary point of collection StaffLink

Data Collection Source/System Public Service Commission Workforce Profile via Corporate Analytics -

Workforce

Primary data source for analysis Public Service Commission Workforce Profile via Corporate Analytics -

Workforce

## Health Outcome 4: Our staff are engaged and well supported

#### **Indicator definition**

The percentage of Aboriginal staff employed in health workforce (i) within all salary bands and (ii) within all occupations

The June 2022 salary bands are as follows:

- < \$51.585
- \$51,586 \$67,751
- \$67,752 \$75,741
- \$75,742 \$95,847
- \$95,848 \$123,947
- \$123,948 \$154,933
- ≥\$154,934

Occupation categories are as specified via Treasury Groupings:

- Medical
- Nursing
- Allied Health Professionals
- Other Prof & Para Professionals & Clinical Support Staff
- Scientific & Technical Clinical Support Staff
- Oral Health Practitioners & Support Workers
- Ambulance Staff
- Clinical Support and Corporate Services
- Hotel Services
- Maintenance & Trades
- Other

Note that Aboriginal people include people who identify as Aboriginal and/or Torres Strait Islander.

#### **Numerator**

Key Performance Indicator

**Outcome** 

Scope

6: The health system is managed sustainably

**Status** 

Final Version number 4.0

The scope of this indicator covers:

NSW Health hospitals and community health services that are recognised as in scope of NSW Activity Based Funded in 2023-24, and

Non-admitted patient service units of the above hospitals and community health services with NSW Establishment Types that are mapped to national Tier 2 Clinic Type Version 8.0 categories that are recognised as in scope of NSW Activity Based Funding in 2023-24.

Services outsourced by a Local Health District / Specialist Health Network under a fee for service or sessional service contract to an external organisation, individual professional health care provider or other Local Health District, that would have met the inclusion criteria had the service not been outsourced, are in-scope.

Goal

Provide greater certainty concerning the volume and complexity mix of non-admitted patient services provided to patients.

**Desired outcome** 

- To improve operating efficiency by enhancing the capacity to manage costs and demand by creating an explicit relationship between volume and complexity mix of services provided and the funding allocation.
- To achieve greater transparency and accountability of resource management, service delivery and performance.

Primary point of collection

Registration and classification of non-admitted patient service units

Scheduling non-admitted patient appointments

Recording non-admitted patient service attendances

Notating service provision details in patient medical records

**Data Collection** Source/System

NSW Non-admitted Patient Data Collection 2023-24 HERO Organisation Service Provider Data Set

LHD Activity Targets agreed for 2023-24

Non-admitted patient activity is recorded in a wide range of source systems, some of which address the needs specific clinical specialties.

The strategic source systems from which the majority of activity is expected are HNA

Millennium / eMR (Cerner), iPM and CHIME.

HERO (Health Establishment Registration On-line system) is the source system used by LHDs / SHNs to register non-admitted patient service units, indicate their parent hospital / community health service and classify them by service unit type.

Primary data source for analysis

**EDWARD Non-admitted Patient Data Mart** 

Note: The data mart acquires its data from the following sources:

EDWARD (activity)

# Health Outcome 6: The health system is managed sustainably

- HERO (service unit details)
- MDS Master Data Services (NWAU weights)

### Indicator definition

Percentage variation of year to date actual non-admitted patient national weighted activity (NWAU 2023-24) from the year to date target.

#### **Numerator**

Numerator definition

Total Final Non-Admitted Patient National Weighted Activity Unit (NWAU 2023-24) for

services delivered from 1 July 2023 to the year to date

Minus

Non-Admitted Patient National Weighted Activity Unit (NWAU 2023-24) Target for

services delivered from 1 July 2023 to the year to date.

Numerator source HERO and EDWARD Non-admitted Patient Data Mart

Numerator availability Available 2 months after the end of the period of measurement.

Denominator

Denominator definition

Non-Admitted Patient National Weighted Activity Unit (NWAU 2023-24) Target for

services delivered from 1 July 2023 to the year to date.

Denominator source

Service Volume for Non-admitted Patient Services in the LHD / SHN Performance

Agreement for 2023-24

Denominator availability

June 2015

### **Inclusions**

In-scope services are based on the principles outlined in the Independent Hospital Pricing Authority National Efficient Price Determination 2023-24, Tier 2 Non-admitted Services Definitions Manual 2023-24 – Version 8.0, and the Australian Institute of Health and Welfare Non-admitted Patient Care Hospital Aggregate National Minimum Data Set Specifications for 2023-24.

There are, however, NSW Health scope variations to those outlined in the IHPA determination. Specific details of record inclusions criteria for this performance indicator and the national weighted activity unit allocation process are outlined in the "Non-admitted Patient Activity Post Load Reporting Compendium for 2023-24" published on the Ministry of Health Intranet.

Non-admitted patient services included in this measure must meet all of the following

The service must contain clinical / therapeutic content that warrants a clinical note being made in the patient's medical record.

- The service must be a direct service provided to the patient (i.e. the patient (or his/her proxy), participated in the service either via face to face attendance, telephone, Telehealth / video-conference or other technology that enables interactive participation).
- The patient must be a non-charge patient and principal funding source of the service must be the NSW State Health budget, or activity funded via a NSW Health bulk purchasing agreement with Department of Veterans' Affairs, the NSW Motor Accident Authority, NSW Work Cover, or the Disability Support Scheme
- The service unit that delivered the service must be registered in HERO and classified to an establishment type category that maps to a NSW ABF funded national Tier 2 Service Type (Version 8.0) for the 2023-24 Service Agreement.

# Health Outcome 6: The health system is managed sustainably

The service unit must have a parent hospital or community health service, as recorded in HERO, that the LHD / SHN and MOH has agreed to fund on an ABF basis for the 2023-24 Service Agreement.

Selected home based services are also included in this measure, as reported as indicated by the service unit's classification to one of the following NSW Service Unit Establishment Type categories:

- 21.04 Total Parenteral Nutrition Home Delivered Procedure Unit
- 21.05 Enteral Nutrition Home Delivered Procedure Unit
- 34.09 Haemodialysis Home Delivered Procedure Unit
- 34.10 Peritoneal Dialysis Home Delivered Procedure Unit
- 36.23 Invasive Ventilation Home Delivered Procedure Unit

### **Exclusions**

The following non-admitted patient services are excluded:

- Non-admitted patient services that are funded via revenue collected by the Local Health District / Specialist Health Network (such as privately referred non-admitted patients and direct federal funding program agreements), or direct revenue from a compensation fund or DVA that is not covered by a NSW Health bulk purchasing agreement.
- Non-admitted patient support services (services that do not contain clinical / therapeutic content, or do not warrant a note being made in the patient's medical record, or were provided by someone who was not a health care professional).
- Non-admitted patient services provided by hospitals or community health services that the LHD / SHN and MOH has agreed to fund on a block funding basis for the 2023-24 Service Agreement. Note: This list differs from the national NWAU determination.
- Non-admitted patient services provided by diagnostic service units, as indicated by the service unit's classification to one of the following NSW Service Unit Establishment Type categories:
  - 13.01 Pathology (Microbiology, Haematology, Biochemistry) Unit 0
  - 13.03 Radiology / General Imaging Diagnostic Unit
  - 13.04 Sonography / Ultrasonography Diagnostic Unit
  - 13.05 Computerised Tomography (CT) Diagnostic Unit
  - 13.06 Magnetic Resonance Imaging (MRI) Diagnostic Unit
  - 13.07 Nuclear Medicine Diagnostic Unit 0
  - 13.08 Positron Emission Tomography (PET) Diagnostic Unit 0
  - 13.14 Public Health Laboratory Service Unit  $\circ$
  - 13.15 Clinical Measurement Respiratory Diagnostic Unit
  - 13.16 Clinical Measurement Cardiology Diagnostic Unit
  - 13.17 Clinical Measurement Neurology Diagnostic Unit
  - 13.18 Clinical Measurement Urology Diagnostic Unit
  - 13.19 Clinical Measurement Renal Diagnostic Unit
  - 13.20 Clinical Measurement Ophthalmology Diagnostic Unit
  - 13.21 Clinical Measurement Vascular Diagnostic Unit
  - 13.22 Clinical Measurement Bone Mineral Density Diagnostic Unit
  - 13.23 Clinical Measurement Endocrine Diagnostic Unit 0

  - 13.24 Clinical Measurement Gastroenterology Diagnostic Unit
  - 13.26 Clinical Measurement Sleep Diagnostic Unit 0
  - 13.27 COVID-19 Diagnostics 0
  - 13.99 Clinical Measurement Diagnostic Unit, NEC 0
  - 15.04 Mammography / Breast Screen Diagnostic Unit

# Health Outcome 6: The health system is managed sustainably

- Non-admitted patient services provided by service units funded under the Mental Health funding program, as indicated by the service unit's classification to the following NSW Service Unit Establishment Type categories:
  - 26.01 Mental Health Acute Unit
  - o 26.02 Mental Health Consultation Liaison Unit
  - 26.03 Mental Health Emergency Care Unit
  - o 26.04 Mental Health Early Intervention Unit
  - 26.05 Mental Health Promotion / Illness Prevention Unit
  - o 26.06 Mental Health Research Unit
  - 26.07 Mental Health General Service Unit
  - 26.08 Mental Health Rehabilitation Unit

  - o 26.10 Mental Health Non-Acute Care Unit
  - 26.15 Specialist Mental Health Allied Health/Nursing Unit
  - 26.16 Mental Health Carer Support Service Allied Health / Nursing Unit
  - 26.17 Eating Disorders Mental Health Unit
- Non-admitted patient services provided by service units purchase via a Dental Weight Activity Unit (DWAU), as indicated by the service unit's classification to the following NSW Service Unit Establishment Type categories:
  - o 28.01 Oral Health / Dental, nfd Procedure Unit
  - 28.02 Oral Health / Adult Dental Procedure Unit
  - 28.03 Oral Health / Child Dental Procedure Unit
  - o 28.04 Oral Health / Combined Adult and Child Dental Procedure Unit
  - o 28.05 Maxillofacial Surgery Medical Consultation Unit
- Non-admitted patient services provided by service units classified to one of the following NSW Service Unit Establishment Type categories:
  - o 13.02 Pharmacy Dispensing Unit
  - o 14.01 Business Unit, nfd
  - 14.02 Administration Service Unit
  - o 14.03 Biomedical Engineering Service Unit
  - 14.04 Business Development / Planning Service Unit
  - o 14.05 Catering Service Unit
  - o 14.06 Cleaning Service Unit
  - 14.07 Facility & Asset Management Service Unit
  - o 14.08 Finance / Billing Service Unit
  - 14.09 Human Resource Service Unit
  - 14.10 Information Management Service Unit
  - 14.11 Information Technology & Communication Service Unit
  - 14.12 Linen Service Unit
  - 14.13 Quality & Safety Service Unit
  - o 14.14 Staff Transport Service / Fleet
  - 18.01 Emergency Department Level 1
  - o 18.02 Emergency Department Level 2
  - 18.03 Emergency Department Level 3
  - o 18.04 Emergency Department Level 4
  - o 18.05 Emergency Department Level 5
  - 18.06 Emergency Department Level 6
  - o 18.07 Emergency Medical Unit
  - o 18.08 Rural Emergency Medicine Unit
  - 24.01 Health Service Intake Unit Administrative
  - o 24.03 Health Service Contact Centre (w or w/o Intake service)

# Health Outcome 6: The health system is managed sustainably

- 24.05 Aboriginal & Torres Strait Islander Liaison and Referral Support Service
- 25.01 Intensive Care Unit
- 25.07 High Dependency Unit
- o 25.08 Coronary Care Unit
- 25.09 Neonatal Intensive Care Unit
- 25.10 Neonatal Special Care Nursery
- o 32.20 Interpreter Services Unit
- o 32.32 Staff Health Unit
- o 32.43 Social/Support/Recreation/Neighbourhood Aid Service Unit
- 39.21 Health Transport Unit (Patient)

  - 11.23 Alcohol & Other Drugs Justice Diversion Services Allied Health / Nursing Unit
  - 11.24 Alcohol & Other Drugs Justice Diversion Services Medical Consultation Unit
  - 11.25 Hospital Drug and Alcohol Consultation Liaison Service

# Health Outcome 6: The health system is managed sustainably

- Any Service Unit which is assigned to an expired NSW Service Unit Establishment Type
- Any service provider where the client / patient (or his / her proxy) did not interact
  with the health care provider (e.g. case conferences, case planning and case
  review services).
- Services provided to patients that are an admitted patient of a NSW Health hospital or under the care of a NSW Health Emergency Department at the time the service was provided.

### **Targets**

Target: Individual targets  $\geq 0\%$  and  $\leq +4\%$  of the negotiated activity target.

- Not performing: < -1.5% or > +4% of the negotiated activity target.
- Under performing: Between ≥ -1.5% and <0 of the negotiated activity target.

Scope

Acute admitted episodes with DRG codes V60-V64 in 2023-24 ABF in-scope hospitals and Small Sites, excluding (i) mental health services provided in designated units and (ii) emergency department only episodes.

Goal

Greater certainty concerning the amount of activity to be performed in a year

**Desired outcome** 

- To improve operating efficiency by enhancing the capacity to manage costs and monitor performance by creating an explicit relationship between funds allocated and services provided
- To achieve greater accountability for management of resources and performance

Primary point of collection

Patient Medical Record

**Data Collection Source/System** 

Hospital PAS, Admitted Patient Data Collection, LHD Activity Targets

Primary data source for

analysis

**EDW** 

Indicator definition

Variation of year to date acute weighted activity (NWAU) from the year to date acute activity target.

**Numerator** 

Numerator definition

Alcohol and other Drugs (Acute) Activity Based Funding for the year to date NWAU separations with DRG codes V60-V64 and an Admitted patient service event end date (SE\_END\_DTTM) within the financial year. Includes an estimate for the NWAU of uncoded activity, based on the average NWAU for that type of case at that

hospital.

Less

Alcohol and other Drugs Activity Based Funding target for the year to date in

NWAU.

NWAU version is 2023-24 for DRG 11.0 (NWAU 23).

Scope (Non Admitted)

The scope of this indicator covers:

- NSW Health hospitals and community health services that are recognised as in scope of NSW Activity Based Funded in 2023-24, and
- Non-admitted patient service units of the above hospitals and community health services with NSW Establishment Types that are mapped to national Tier 2 Clinic Type Version 8.0 categories Tier 2 clinics (20.52, 40.30) that are recognised as in scope of NSW Activity Based Funding in 2023-24.

Services outsourced by a Local Health District / Specialist Health Network under a fee for service or sessional service contract to an external organisation, individual professional health care provider or other Local Health District, that would have met the inclusion criteria had the service not been outsourced, are in-scope.

the in

Greater certainty concerning the amount of activity to be performed in a year

**Desired outcome** 

Goal

- To improve operating efficiency by enhancing the capacity to manage costs and monitor performance by creating an explicit relationship between funds allocated and services provided
- To achieve greater accountability for management of resources and performance

Primary point of collection

Patient Medical Record

Registration and classification of non-admitted patient service units

Scheduling non-admitted patient appointments
Recording non-admitted patient service attendances

Notating service provision details in patient medical records

**Data Collection Source/System** 

NSW Non-admitted Patient Data Collection 2023-24

HERO Organisation Service Provider Data Set LHD Activity Targets agreed for 2023-24

Non-admitted patient activity is recorded in a wide range of source systems, some of which address the needs specific clinical specialties.

The strategic source systems from which the majority of activity is expected are HNA Millennium / eMR (Cerner), iPM and CHIME.

HERO (Health Establishment Registration On-line system) is the source system used by LHDs / SHNs to register non-admitted patient service units, indicate their parent hospital / community health service and classify them by service unit type

### Inclusions

Facilities in scope of ABF in 2023-24

Non Admitted in-scope services are based on the principles outlined in the Independent Hospital Pricing Authority National Efficient Price Determination 2023-24, Tier 2 Non-admitted Services Definitions Manual 2023-24 – Version 8.0, and the Australian Institute of Health and Welfare Non-admitted Patient Care Hospital Aggregate National Minimum Data Set Specifications for 2023-24.

There are, however, NSW Health scope variations to those outlined in the IHPA determination. Specific details of record inclusions criteria for this performance indicator and the national weighted activity unit allocation process are outlined in the "Non-admitted Patient Activity Post Load Reporting Compendium for 2023-24".

Non-admitted patient services included in this measure must meet all of the following criteria:

- The service must contain clinical / therapeutic content that warrants a clinical note being made in the patient's medical record.
- The service must be a direct service provided to the patient (i.e. the patient (or his/her proxy), participated in the service either via face to face attendance, telephone, Telehealth / video-conference or other technology that enables interactive participation).
- The patient must be a non-charge patient and principal funding source of the service must be the NSW State Health budget, or activity funded via a NSW Health bulk purchasing agreement with Department of Veterans' Affairs, the

# Health Outcome 6: The health system is managed sustainably

NSW Motor Accident Authority, NSW Work Cover, or the Disability Support Scheme

- The service unit that delivered the service must be registered in HERO and classified to an establishment type category that maps to a NSW ABF funded national Tier 2 Service Type (Version 8.0) for the 2023-24 Service Agreement.
- The service unit must have a parent hospital or community health service, as recorded in HERO, that the LHD / SHN and MOH has agreed to fund on an ABF basis for the 2023-24 Service Agreement.

### **Exclusions**

The following non-admitted patient services are excluded:

- Non-admitted patient services that are funded via revenue collected by the Local Health District / Specialist Health Network (such as privately referred nonadmitted patients and direct federal funding program agreements), or direct revenue from a compensation fund or DVA that is not covered by a NSW Health bulk purchasing agreement.
- Non-admitted patient support services (services that do not contain clinical / therapeutic content, or do not warrant a note being made in the patient's medical record, or were provided by someone who was not a health care professional).
- Non-admitted patient services provided by hospitals or community health services that the LHD / SHN and MOH has agreed to fund on a block funding basis for the 2023-24 Service Agreement. Note: This list differs from the national NWAU determination.
- Non-admitted patient services provided by service units funded under the Mental Health funding program
- Any Service Unit which is assigned to an expired NSW Service Unit Establishment Type
- Any service provider where the client / patient (or his / her proxy) did not interact with the health care provider (e.g. case conferences, case planning and case review services).
- Services provided to patients that are an admitted patient of a NSW Health hospital or under the care of a NSW Health Emergency Department at the time the service was provided.

# **Targets**

Target: Individual targets  $\ge 0\%$  and  $\le +4\%$  of the negotiated activity target.

- Not performing: < -1.5% or > +4% of the negotiated activity target.
- Under performing: Between ≥ -1.5% and <0 of the negotiated activity target.

**Previous IDs:** 

Shortened Title Purchased Activity Variance: Dental

Service Agreement Type Key Performance Indicator

**NSW Health Strategic Outcome** 6: The health system is managed sustainably

Status Final Version number 3.0

**Scope** All dental care items that are provided through public oral health services on a

non-admitted basis for eligible children and adults.

Goal To monitor the pressure on public dental waiting lists and non-admitted dental

service activity with a particular focus on Indigenous patients, patients at high risk of, or from, major oral health problems and those from rural areas.

**Desired outcome** That the indicator identifies total non-admitted dental activity, taking into

account the relative complexity of dental care provided in a dental

appointment.

Titanium

**Primary point of collection** Providing dental clinician (dentist or dental therapist or dental oral health

therapist or dental Prosthetist/technicians)

Data Collection Source/System Titanium

Primary data source for analysis

Indicator definition Variation of year to date dental weighted activity (DWAU) from the year to

date acute activity target.

A Dental Weighted Activity Unit (DWAU) is a Commonwealth measure based on the relative value of treatment provided in dental appointments. 1 DWAU is the equivalent of 11 dental examination items (ADA item number 011). The Commonwealth have a code set of allowable ADA treatment items with relative weighting against the index value of the 011, which is supplemented

by NSW-based weighting for certain service items.

**Numerator** 

Numerator definition Dental weighted activity for the year to date.

Note: Actual activity includes an estimate for unclaimed vouchers.

Numerator source Titanium

Numerator availability

Denominator

Denominator definition Dental weighted activity target for the year to date.

Denominator source LHD Activity Targets

Denominator availability Available when targets finalised.

Inclusions All public oral health eligible patients who have received dental care in NSW

public dental clinic or under the NSW OHFFSS in the time period.

### Health Outcome 6: The health system is managed sustainably

**Exclusions** NSW residents who are not eligible for public dental care, and NSW residents

who received dental care associated with provision of a general anesthetic as

an admitted patient in a public hospital.

**Targets** 

Target: Individual targets  $\geq 0\%$  and  $\leq +4\%$  of the negotiated activity target.

• Not performing: < -1.5% or > +4% of the negotiated activity target.

• Under performing: Between  $\geq$  -1.5% and <0 of the negotiated activity

target.

**Context** Delivering a minimum level of public dental activity is currently required as

part of Commonwealth funding arrangements for dental services.

Asset Maintenance Expenditure

Key Performance Indicator

6: The health system is managed sustainably

Final

1.3

**Scope**Maintenance expense includes all costs incurred in planning, supervising,

managing or executing works involved in or related to maintaining capitalised assets owned or controlled by Public Health Organisations and extends to maintenance for buildings, plant and equipment (including

medical equipment) recognized on the balance sheet.

Goal To minimise asset maintenance related risks and obtain expected economic

benefits of assets.

**Desired outcome**Better management of required maintenance levels to ensure compliant,

safe, and fit for purpose assets.

**Primary point of collection**General ledger, maintenance expense and gross carrying amounts.

**Data Collection Source/System** 

Maintenance Expense:

Maintenance contracts

Repairs & Maintenance / Non Contract

Other Maintenance expenses

 Maintenance Expense – Contracted Labour and Other (Non-Employee Polisted)

Employee Related)

• Employee Related Expense

New and Replacement Equipment under \$10,000

Asset Replacement Value (ARV) through Asset Gross Carrying amounts for:

• Buildings (excluding Works In Progress)

Plant & Equipment (excluding Works In Progress)

Primary data source for analysis

Oracle Stafflink

Indicator definition

The amount of money spent within a Financial Year maintaining assets, divided by the Asset Replacement Value (ARV) of the assets being

maintained, expressed as a percentage

or in other words

Maintenance Expense (\$) as a percentage (%) of Asset Replacement Value (\$)

or in mathematical terms

# Health Outcome 6: The health system is managed sustainably

Maintenance Expense per Asset Replacement Value (%) = Total Maintenance Expense (\$) x 100 / Total Asset Replacement Value (\$)

**Numerator** 

Numerator definition Total maintenance expense (excluding new and replacement equipment

under \$10,000) across PHOs per quarter (quarter of Financial Year) for building and plant and equipment assets (including medical equipment) that

is recognised on the balance sheet

Numerator source Maintenance Expense accounts

Numerator availability Available monthly, reported quarterly

**Denominator** 

Denominator definition Total value of building and plant and equipment assets (including medical

equipment) recognised on the balance sheet across PHOs.

Denominator source The PPE Reconciliation Note in the Financial Statements

Denominator availability Available monthly, reported quarterly

Inclusions Included PHOs:

All Local Health Districts

HealthShare

Ambulance Service of NSW

Sydney Children's Hospital Network

NSW Pathology

Plus: 'Total of included entities'

Capitalised building and plant and equipment assets (including medical equipment) recognised on balance sheet.

Maintenance expenses include labour and materials for maintenance works.

**Exclusions** Excluded from calculations of ARV:

Work In Progress

New and replacement equipment under \$10,000

Excluded from calculations of Maintenance Expense

 Major inspection costs of capitalized assets where costs are recognised in the carrying amount of the asset

**Target** 2.15%

Performing: ≥2.15Not performing: <1.15</li>

• Under performing: ≥1.15 and <2.15

The indicator allows comparisons of the expenditures for maintenance between Public Health Organisations, as well as to performance in last Financial Year's guarter.

# Health Outcome 6: The health system is managed sustainably

The ARV is used in the denominator to normalise the measurement given that asset portfolios vary in size and value.

This indicator will also be used as a Whole-of-Government indicator under Treasury's Financial Management Transformation (FMT) program as well as an indicator under Property NSW's Property Asset Utilisation Taskforce (PAUT) Phase II reforms.

Context

- Health Asset Management reform program
- Financial Management Transformation (FMT) program

New technology or capital works or procurement

Intangible assets

**Target** 1.4%

**Exclusions** 

Performing: ≥1.4

Under performing: ≥0.8 and <1.4

Not performing: <0.8

Context The capital renewal ratio is an annually reported metric to Infrastructure

NSW (INSW) as the primary assurance agency for NSW Treasury in accordance with the Government Asset Management for Public Sector Policy (TPP 19-07). INSW's State of infrastructure metrics note industry

standard targets for capital renewal range from 1.7% to 2.5%.

Given NSW Health's current level of asset management maturity and considering the agency level capital renewal ratio results since the inception of the NSW Government Asset Management Policy (TPP 19-07), the target of 1.4% has been identified as appropriate for NSW

Health.

Further review and definition of this target will be undertaken during the transition to TPP 19-07 compliance, and it is anticipated that the target may change as asset management maturity, capability and performance

monitoring improves across NSW Health.

Health Outcome 6: The health system is managed sustainably

INDICATOR: KPI23-004 Sustainability Towards 2030: Desflurane

Previous IDs: Reduction: Number of Vials of Desflurane

Purchased as a Percent of All Volatile Anaesthetic

Vials Purchased

Shortened Title Sustainability Towards 2030: Desflurane

Service Agreement Type Key Performance Indicator

Framework Strategy NSW Health Future Health Strategic Framework 2022-32: The health

system is managed sustainability.

Framework Objective 6: The health system is managed sustainably.

6.2: Commit to an environmentally sustainable footprint for future

healthcare.

Status Final Version number 1.0

**Scope** Pharmacy ordering details by LHD.

Goal NSW hospitals reduce direct carbon emissions by reducing Desflurane

use

**Desired outcome**To reduce use of Desflurane to less than 4% of fluorinated anaesthetic

gas vials, thereby reducing carbon emissions from this potent volatile

anaesthetic gas

**Primary point of collection** The required data will be generated by the Senior Data Analyst, Climate

Risk & Net Zero Unit, collected from Anaesthetic gas purchase records

from Pharmalytix.

Data reports will be provided quarterly to System Information & Analytics

for inclusion in the Health System Performance Reports.

**Data Collection Source/System** 

Primary data source for analysis Pharmalytix / iPharmacyPROD database

Indicator definition Decreased use of Desflurane, measured by number of vials of

Desflurane purchased as percent of all volatile anaesthetic vials

purchased.

Numerator

Numerator definition Number of vials of 'Desflurane (Suprane) Inhalation 240mL' in

Pharmalytix records for the year-to-date.

Numerator source Pharmalytix

Numerator availability N/A

**Denominator** 

### Health Outcome 6: The health system is managed sustainably

Denominator definition Number of vials of 'Desflurane (Suprane) Inhalation 240mL'+

'Sevoflurane Inhalation 250mL' + 'Isoflurane Inhalation 250mL' in

Pharmalytix records for the year-to-date.

Denominator source Pharmalytix

Denominator availability N/A

**Inclusions** All pharmacy records within public hospitals. LHDs that have already

ceased using Desflurane will be compliant with this KPI.

**Exclusions** 

**Targets** 

Target Target 4%

Performing: <=4%</li>

Under Performing: >=4% and <8%</li>

Not Performing: >=8%

**Context** Desflurane is 2,540 times more potent as a greenhouse gas than carbon

dioxide. Reducing the number of vials of Desflurane will lower the direct carbon emissions attributed to use and release of this extremely potent

volatile gas during hospital surgeries.

There are clinically equivalent, lower carbon alternatives, for example

Total Intravenous Anaesthesia (TIVA) and Sevoflurane.

This indicator measures improved anaesthetic choices - lower relative

use of Desflurane compared to Sevoflurane and Isoflurane.

There will be associated cost savings for each LHD as Desflurane is the

most expensive of the anaesthetic options.

This target aims to reduce the number of Desflurane vials down to 4% of

the total, meaning only 1 in 25 anaesthetic vials will be Desflurane.

LHDs and Networks that have already ceased using Desflurane are

inds and networks that have already deased using t

exempt from this KPI.

**Related Policies/ Programs**This indicator aligns with the NSW Government's Net Zero Plan Stage

1:2020-2030 and goal to reach net zero emissions by 2050.

Related plan can be sourced from:

Net Zero Plan | NSW Climate and Energy Action

Minimum size 2

Maximum size 5

Data domain

Date effective 1 July 2023

Health Outcome 6: The health system is managed sustainably

INDICATOR: KPI23-005 Sustainability Towards 2030: Nitrous Oxide

Previous IDs: Reduction: Emissions Per Admitted Patient Service

Event

**Shortened Title** Sustainability Towards 2030: N<sub>2</sub>O

Service Agreement Type Key Performance Indicator

Framework Strategy NSW Health Future Health Strategic Framework 2022-32: The health

system is managed sustainability.

Framework Objective 6: The health system is managed sustainably.

6.2: Commit to an environmentally sustainable footprint for future

healthcare.

Status Final Version number 1.0

Scope Ordering details by LHD and admitted patients in public hospitals, except

where indicated in Exclusions.

Goal NSW hospitals reduce direct greenhouse gas emissions by reducing

nitrous oxide wastage.

**Desired outcome**To reduce direct emissions attributed to nitrous oxide use in ED, ICU,

Oral Health, Pediatrics, Theatres and Birthing units (CO<sub>2</sub>e reduced 5%).

**Primary point of collection** The required data will be generated by the Senior Data Analyst, Climate

Risk & Net Zero Unit, calculated from:

 Nitrous oxide gas refill datasets from HealthShare NSW's Strategic Procurement Services' procurement records; and

Admitted patient records from EDWARD

Data reports will be provided quarterly to System Information & Analytics

for inclusion in the Health System Performance Reports.

**Data Collection Source/System** Nitrous oxide gas refill datasets; Admitted Patient data collection

Primary data source for analysis EDWARD, Pharmalytix / iPharmacyPROD database

**Indicator definition** Decreased nitrous oxide greenhouse gas emissions (kg CO<sub>2</sub>e) per

admitted patient service event.

Numerator

Numerator definition YTD kg CO<sub>2</sub>e emissions attributed to N<sub>2</sub>O and Entonox<sup>®</sup> (Equanox<sup>®</sup> /

Nitronox®) gas cylinder procurement

Numerator source HealthShare datasets on cylinders by site (suppliers: Coregas, Air

Liquide and BOC)

Numerator availability Reliance on third parties for adequate record keeping and timely data

provision

Denominator

Denominator definition YTD Number of admitted patient service events (SE\_TYPE\_CD = '2')

### Health Outcome 6: The health system is managed sustainably

Denominator source **EDW** Denominator availability N/A

Inclusions All LHDs, SCHN and SVHN

**Exclusions** Patient Transport/Ambulance excluded. Hospital in the Home service

events excluded.

**Targets** 

**Target** Target: 5% reduction in the rate of emissions per admitted patient service

event (YTD) compared to the baseline rate as at 30 June the previous

vear

Performing: >=5%

Under Performing: >=1% and <5%

Not Performing: <1%

Context Nitrous oxide has an environmental impact 273 times that of carbon

> dioxide. Reducing the volume of nitrous oxide procured across LHDs can be achieved in the first instance by investigating and addressing leaking

infrastructure at facilities. Evidence from around the world has

consistently shown a substantial proportion of nitrous oxide is wasted due to leaks in the manifolds, pipes, wall outlets and pendants. Five percent is a modest target compared to what has been achieved elsewhere by addressing leaks, decommissioning sections of piping, and/or converting to mobile nitrous cylinders (where appropriate rather than older manifolds

and piping).

**Related Policies/ Programs** This indicator aligns with the NSW Government's Net Zero Plan Stage

1:2020-2030 and goal to reach net zero emissions by 2050.

Health Outcome 6: The health system is managed sustainably

INDICATOR: KPI23-006

Waste Streams - Resource Recovery and Diversion from Landfill (%)

**Previous IDs:** 

**Shortened Title** 

Diversion of Waste from Landfill Key Performance Indicator

**Service Agreement Type** Framework Strategy

NSW Health Future Health Strategic Framework 2022-32: The health

system is managed sustainability.

Framework Objective 6: The health system is managed sustainably.

6.2: Commit to an environmentally sustainable footprint for future

healthcare.

Final **Status** 1.0 Version number

Local Health Districts and Health entities. Scope

Meet or exceed the National Waste Policy Action Plan target of 80% Goal

average resource recovery rate from all waste streams (excluding

hazardous waste) by 2030.

Reduce the amount of waste disposed to landfill by increasing the amount of waste diverted to non-landfill disposal by a minimum of 5% per

annum compared to the previous reporting period.

Cost savings and increased percentages in diversion from landfill by **Desired outcome** 

2030 in line with National Waste Policy Action Plan's 80% target.

Primary point of collection NSW Treasury Power BI reports under Whole of Government 9698

contract, monthly data reports from suppliers.

**Data Collection Source/System** NSW Treasury Power BI System, Suppliers monthly Microsoft Excel

reports, Annual Business Review reporting.

Waste Management volumes and percentages from supplier reports as Primary data source for analysis

set out in the Whole of Government C9698 Waste Management Contract.

Indicator definition The change (% increase) in the amount of waste diverted from landfill under the C9698 Whole of Government Contract in the reporting year,

when compared to the previous reporting year.

**Calculation Methodology:** 

For the reporting year (FY) and the previous reporting year (FY) calculate: The amount of waste diverted from disposal to landfill including

waste diverted:

by waste contractors using downstream methods as reported in

the Annual Business Review; AND,

b) through the implementation of services, strategies and projects

at Health facilities.

represented as a percentage of the total waste generated under the C9698 Whole of Government Contract. NB: Total waste excludes hazardous/clinical waste as unrecyclable and potentially harmful to

human health.

### Health Outcome 6: The health system is managed sustainably

Determine the level of change (%) between the current reporting year and the previous reporting year.

Notes:

Includes landfill diversion by downstream methods as reported in the Annual Business Review and the total volume of recycled waste (source separated) as a percentage of the total waste generated. NB: Total waste excludes hazardous/clinical waste as unrecyclable and potentially harmful to human health.

Calculating baseline requires landfill diversion percentages of waste at landfill and resource recovery facilities. This is provided in a report at each annual business review based on the Whole of Government Contract. The percentage includes a combination of Government Agencies based on the recovery facility.

The HealthShare Corporate Services - Strategic Procurement Team is available to assist in determining performance against this KPI.

Numerator

Numerator definition The total amount of waste diverted from disposal to landfill under the

C9698 Whole of Government Contract.

Numerator source Information about the resource recovery rates can be determined by

direct measurement, or by reference to contractually agreed percentage levels of diversion from landfill, or recycled volumes that are guaranteed

by the supplier(s).

Numerator availability Direct measurement must be based on a minimum of 6 months of data.

Supplier determined figures must be agreed and not based on estimates unless those estimates have been reviewed and confirmed by an independent third party such as NSW Treasury WofG Contract Management Team. The HSNSW Corporate Procurement team is

available to assist in verifying.

**Denominator** 

Denominator definition The total waste generated under the C9698 Whole of Government

Contract. NB: Total waste excludes hazardous/clinical waste as

unrecyclable and potentially harmful to human health.

Denominator source C9698 Waste Management Reporting, NSW Treasury Power BI Waste

Reporting, Supplier Annual Business Reviews.

Denominator availability Available

**Inclusions** General Waste, Recyclable Waste.

**Exclusions** Hazardous waste or other waste types that may be harmful to human

health.

**Targets** 

Target 5% increase on previous year.

Performing: ≥5 %

Under Performing: ≥3 and <5 %

Not Performing: <3 %

### Health Outcome 6: The health system is managed sustainably

**Context** National Waste Action Plan requires Government Agencies to achieve

80% diversion by 2030. The achievement of this KPI will contribute to

NSW Health's efforts to achieve the 2030 goal.

Related Policies/ Programs National Waste Management Action Plan; NSW Government Resource

Efficiency Policy.

The National Waste Policy Action Plan

Framework Objective

6: The health system is managed sustainably.

6.2: Commit to an environmentally sustainable footprint for future

healthcare.

Status Version number Final

Scope

Local Health Districts, NSW Ambulance Service, NSW Health Pathology,

HealthShare NSW.

Goal

Reduce stationary energy consumption to reduce carbon emissions in line with State objectives. Minimize spend and generate financial savings

for the Health network.

**Desired outcome** 

Cost savings and the achievement of the State's Net Zero targets for

2030 and 2035.

Primary point of collection

Asset Managers, Energy Managers, Energy Project Managers.

**Data Collection Source/System** 

AFM Online as the primary asset data central register for NSWH, Utility Billing Records, internal data management systems, GREP Reporting.

Primary data source for analysis

Utility providers using electricity meters, gas meters, electricity/gas/LPG

billing.

Indicator definition

The total amount of energy use that will be avoided through the implementation of energy efficiency or renewable energy projects that were completed during the reporting year (FY), expressed as a proportion of the total energy use in the previous year (FY).

#### Calculation Methodology:

To determine the total amount of energy use that will be avoided through the implementation of energy efficiency or renewable energy projects that were completed during the reporting year (FY):

- 1) Determine baseline energy consumption (total elect, gas, non-automotive LPG) using FY2022/23 data. Convert all figures to a single unit of measurement (watt-hours or joules). Call this Value A.
- 2) Determine the total amount of energy use that will be avoided by the implementation of energy efficiency or renewable energy projects that were completed during the reporting year. i.e. determine the total annual energy savings for all projects implemented during the reporting year. Convert all figures to a single unit of measurement (watt-hours or joules). Call this Value B.

### Health Outcome 6: The health system is managed sustainably

3) Determine what percentage Value B is of Value A.

Conversion factors necessary for determining baseline (converting to a single unit of measurement, either watt-hours or joules) can be obtained from the National Greenhouse Accounts Factors, Australian Government, Department of Industry, Science, Industry and Resources.

The MoH Asset Information and Sustainability Team FSAM is available to assist in calculating performance against this KPI.

#### **Numerator**

Numerator definition The total amount of energy use that will be avoided through the

implementation of energy efficiency or renewable energy projects that

were completed during the reporting year (FY).

Numerator source Information about the energy reduction delivered by a given energy

efficiency/renewable energy project can be determined by direct measurement, or by reference to contractually agreed levels of energy savings including renewable energy certificate savings certificate values,

or energy savings that are guaranteed by the supplier(s).

Numerator availability <u>Completed Projects</u>: Direct measurement of the energy reduction

delivered by a given energy efficiency/renewable energy project based

on a minimum of 3 months data.

Projects that are partly complete for first reporting period:

Either: supplier estimates that are contractually agreed; or, estimates that have been confirmed by an independent third party with relevant

qualifications.

The MoH Asset Information and Sustainability Team, FSAM is available

to assist in verifying energy savings figures.

#### Denominator

Denominator definition FY2022/23 energy consumption – all utility supplied electricity, and

natural gas, and all non-automotive LPG. FY2022/23 data to be used to calculate energy use baseline. Convert to a single unit of measurement,

either watt-hours or joules.

Conversion factors are available from the National Greenhouse Accounts

Factors, Australian Government, Department of Industry, Science, Industry and Resources. MoH Asset Information and Sustainability Team

FSAM can assist with the calculation of baselines.

Denominator source GREP Reporting, AFM Online, Historical Utility Billing.

Denominator availability Available

#### Inclusions

 All utility supplied electricity consumption for large and small sites (C3062)

- All utility supplied natural gas consumption for large and small sites (C938 and C4000 respectively)
- All non-automotive LPG consumption (C349)
- Any off-contract consumption of electricity, natural gas and nonautomotive LPG

### Health Outcome 6: The health system is managed sustainably

**Exclusions** Energy consumption by vehicles/fleet (fleet fuels including automotive

LPG).

**Targets** 

Target 1.5% PA.

Performing: ≥1.5 %

Under Performing: ≥1 and <1.5%

Not Performing: <1 %

The MoH Asset Information and Sustainability Team FSAM is available to

assist in calculating performance against this KPI.

Context The NSW Government's Net Zero Plan (Stage 1 2020-2030) requires

Government Agencies to achieve 50% reduction in carbon emissions by 2030, and a 70% reduction by 2035. There are also mandated targets in place for renewable energy generation (solar panels). By implementing projects that reduce our reliance on grid electricity, Health Organisations will greatly contribute to NSW Health's efforts to achieve these targets.
