Interested to understand

- funding implications of weighted NwAU on only cross border health service- Albury Wodonga health.

- infrastructure expenditure and allocation.... Similar catchment size receiving vastly different distributions of funding (contrast tweed hospital with AWH)

- reviewing infrastructure expenditure and relative growth in points of care (Wagga base hospital being an example of major expenditure with minimal uplift in points of care)

- medical models and blend of activity based with staff base to increase activity of medical staff

- modernizing models of care to ensure efficiency and cost effectiveness.

Would appreciate an opportunity to present to NSW inquiry on impacts to AWH despite being a Victorian operated health service
